Contents

H.T. Banks, F. Kappel and C. Wang:
A semigroup formulation of a nonlinear size-structured distributed rate population model 1

H.T. Banks and Y. Wang:
Damage detection and characterization in smart material structures 21

M. Bergounioux, T. Männikkö and D. Tiba:
Optimality conditions for non-qualified parabolic control problems 45

C.I. Byrnes, D.S. Gilliam and V.I. Shubov:
Convergence of trajectories for a controlled viscous Burgers' equation 61

P. Cannarsa and M.E. Tessitore:
Optimality conditions for boundary control problems of parabolic type 79

E. Casas:
Pontryagin's principle for optimal control problems governed by semilinear elliptic equations 97

H.O. Fattorini:
Invariance of the Hamiltonian in control problems for semilinear parabolic distributed parameter systems 115

B.G. Fitzpatrick:
Rate distribution modeling for structured heterogeneous populations 131

S.W. Hansen:
A model for a two-layered plate with interfacial slip 143

M. Heinkenschloss and E.W. Sachs:
Numerical solution of a constrained control problem for a phase field model 171

M.A. Horn and I. Lasiecka:
Uniform stabilizability of nonlinearly coupled Kirchhoff plate equations 189

K. Ito:
Boundary temperature control for thermally coupled Navier-Stokes equations 211

J. Kazimir and I.G. Rosen:
Adaptive estimation of nonlinear distributed parameter systems 231

V. Komornik:
Decay estimates for the wave equation with internal damping 253

W. Krabs:
On the controllability of the rotation of a flexible arm 267

J.E. Lagnese:
Modeling and controllability of interconnected elastic membranes 281

G. Leugering:
On feedback controls for dynamic networks of strings and beams and their numerical simulation 301

T. Roubíček:
Various relaxations in optimal control of distributed parameter systems 327

F. Tröltzsch:
Convergence of an SQP–method for a class of nonlinear parabolic boundary control problems 343

M. YAMAMOTO:
Conditional stability in determination of densities of heat sources in a bounded domain 359

B.-Y. ZHANG:
Boundary stabilization of the Korteweg-de Vries equation 371

E. ZUAZUA:
Controllability of the linear system of thermoelasticity: Dirichlet-Neumann boundary conditions 391
