Contributors ix

Preface xiii

Part I. Multiresolution and Multilevel Analyses

Non-stationary Multiscale Analysis
Albert Cohen 3

The Spectral Theory of Multiresolution Operators and Applications
Peter Niels Heller and Raymond O. Wells, Jr. 13

Multiresolution Analysis, Haar Bases and Wavelets on Riemannian Manifolds
Stephan Dahlke 33

Orthonormal Cardinal Functions
T. N. T. Goodman and Charles A. Micchelli 53

Part II. Wavelet Transforms

Some Remarks on Wavelet Representations and Geometric Aspects
Bruno Terrésani 91

A Matrix Approach to Discrete Wavelets
Jaroslav Kautsky and Radka Turcajová 117

A Unified Approach to Periodic Wavelets
Gerlind Plonka and Manfred Tasche 137

Part III. Spline Wavelets

Spline Wavelets over R, Z, R/NZ, and Z/NZ
Gabriele Steidl 155

A Practice of Data Smoothing by B-Spline Wavelets
Susumu Sakakibara 179

L-Spline Wavelets
Tom Lyche and Larry L. Schumaker 197

Wavelets and Frames on the Four-Directional Mesh
Charles K. Chui, Kurt Jetter, and Joachim Stöckler 213

Part IV. Other Mathematical Tools for Time-Frequency Analysis

On Minimum Entropy Segmentation
David L. Donoho 233

Adaptive Time-Frequency Approximations with Matching Pursuits
Geoffrey Davis, Stéphane Mallat, and Zhifeng Zhang 271

Getting Around the Balian-Low Theorem Using Generalized Malvar Wavelets
Bruce W. Suter and Mark E. Oxley 295

Time Scale Energetic Distribution
Guy Courbebaisse, Bernard Escudié, and Thierry Paul 311

Part V. Wavelets and Fractals

Some Mathematical Results about the Multifractal Formalism for Functions
Stephane Jaffard 325

Fractal Wavelet Dimensions and Time Evolution
Matthias Holschneider 363

Part VI. Numerical Methods and Algorithms

Multiscale Methods for Pseudo-Differential Equations on Smooth Closed Manifolds
Wolfgang Dahmen, Siegried Prössdorf, and Reinhold Schneider . . . 385

Wavelet Methods for the Numerical Solution of Boundary Value Problems on the Interval
Silvia Bertoluzza, Giovanni Naldi, and Jean Christophe Ravel . . . 425

On the Nodal Values of the Franklin Analyzing Wavelet
Dimitri Karayannakis 449

Parallel Numerical Algorithms with Orthonormal Wavelet Packet Bases
Laura Baccheli Montefusco 459

Representation of the Atomic Hartree-Fock Equations in the Wavelet Basis by Means of the BCR Algorithm
Patrick Fischer and Mireille Defranceschi 495

Part VII. Applications

Efficiency Comparison of Wavelet Packet and Adapted Local Cosine Bases for Compression of a Two-dimensional Turbulent Flow
Mladen Victor Wickerhauser, Marie Farge, Eric Goirand, Eva Wesfreid, and Echeyde Cubillo 509

Wavelet Spectra of Buoyant Atmospheric Turbulence
Meinhard E. Mayer, Lonnie Hudgins, and Carl A. Friehe 533

Experimental Study of Inhomogeneous Turbulence in the Lower Troposphere by Wavelet Analysis
Aimé Druilhet, Jean-Luc Attié, Leonardo de Abreu Sá, Pierre Durand, and Bruno Bénech 543

Applications of Wavelet Transform for Seismic Activity Monitoring
Gabriella Olmo and Letizia Lo Presti 561

Mean Value Jump Detection: A Survey of Conventional and Wavelet Based Methods
Aline Denjean and Francis Castanié 573

Comparison of Picture Compression Methods: Wavelet, Wavelet Packet, and Local Cosine Transform Coding
Mladen Victor Wickerhauser 585

Subject Index 623
