

Contents

Part 1. Emphasizing the External	1
Imagery for diagrams	3
<i>Tommy Dreyfus</i>	
External representations in arithmetic problem solving	20
<i>Giuliana Dettori and Enrica Lemut</i>	
Visualisation in mathematics and graphical mediators: an experience with 11–12 year old pupils	34
<i>Angela Pesci</i>	
Visual organisers for formal mathematics	52
<i>David Tall</i>	
Mediating mathematical action	71
<i>Rosamund Sutherland</i>	
Mathematical objects, representations, and imagery	82
<i>Willibald Dörfler</i>	
Part 2. Imagery in Support of Geometry	95
Images and concepts in geometrical reasoning	97
<i>M. Alessandra Mariotti</i>	
Between drawing and figure	117
<i>Reinhard Hölzl</i>	
The functions of visualisation in learning geometry	125
<i>Eric Love</i>	
Geometrical pictures: kinds of representation and specific processings	142
<i>Raymond Duval</i>	

Part 3. Linking Screen and Mental Imagery	159
Overcoming physicality and the external present: cybernetic manipulatives <i>James J. Kaput</i>	161
On visual and symbolic representations	178
<i>Luis E. Moreno A. and Ana Isabel Sacristán R.</i>	
The dark side of the Moon	190
<i>Richard Noss and Celia Hoyles</i>	
Ruminations about dynamic imagery (and a strong plea for research)	202
<i>E. Paul Goldenberg</i>	
On designing screen images to generate mental images	225
<i>Richard J. Phillips, John Gillespie, and Daniel Pead</i>	
Learning as embodied action	233
<i>Stephen Campbell and A. J. (Sandy) Dawson</i>	
Part 4. Employing Imagery	251
The importance of mental perception when creating research pictures	252
<i>Monique Sicard and Jean-Alain Marck</i>	
Random images on mental images	263
<i>Mario Barra</i>	
Imagery as a tool to assist the teaching of algebra	277
<i>Dave Hewitt</i>	
Mathematical screen metaphors	291
<i>John Mason and Benedict Heal</i>	
Exploiting mental imaging: reflections of an artist on a mathematical excursion	309
<i>Stephen A.R. Scrivener</i>	
Index	323
