CONTENTS

Foreword xiii

Preface xv

Probability distributions on cladograms 1
David Aldous

Stability of self-organizing processes 19
Robert M. Burton and William G. Faris

Some examples of normal approximations by Stein's method 25
Amir Dembo and Yosef Rinott

Large deviations for random distribution of mass 45
Amir Dembo and Ofer Zeitouni

Random minimax game tress 55
Luc Devroye and Olivier Kamoun

Metrics on compositions and coincidences among renewal sequences 81
Persi Diaconis, Susan Holmes, Svante Janson, Steven P. Lalley, and Robin Pemantle

The no long odd cycle theorem for completely positive matrices 103
John H. Drew and Charles R. Johnson

A note on triangle-free graphs 117
Paul Erdös, Svante Janson, Tomasz Luczak, and Joel Spencer

Intersections and limits of regenerative sets 121
Bert Fristedt

Random processes of the form $X_{n+1} = a_n X_n + b_n \pmod{p}$ where b_n takes on a single value 153
Martin Hildebrand

The second moment method, conditioning and approximation 175
Svante Janson

How fast and where does a random walker move on a random tree? 185
Russell Lyons

A note on recurrence, amenability, and the universal cover of graphs 199
Sam Northshield

On which graphs are all random walks in random environments transient? 207
Robin Pemantle and Yuval Peres

Energy, and intersections of Markov chains 213
Thomas S. Salisbury
