Preface	xiii
<i>Planary Lectures</i>	
Multiscale structure for hyperbolic waves BRIAN BOSTON, JAMES GLIMM, JOHN W. GROVE, RICHARD HOLMES, AND QIANG ZHANG	1
Euler-Poisson-Darboux equations and hyperbolic conservation laws GUI-QIANG CHEN	11
Entropy for hyperbolic systems of conservation laws in several space di- mensions C. M. DAFERMOS	27
Some results on nonlinear evolution equations XIA-XI DING	43
The zero dispersion limit, a deterministic analogue of turbulence PETER D. LAX	53
Nonlinear waves for viscous conservation laws TAI-PING LIU	65
Singular perturbation problems to a combustion equation in very long cylin- drical domains M. MIMURA, K. SAKAMOTO, AND S.-I. EI	75
Particle-like solutions of the Einstein-Yang-Mills equations and the exis- tence of an exotic black-hole solution J. A. SMOLLER AND A. G. WASSERMAN	85
The large time behavior of Cauchy problems for a dissipative Benjamin- Ono type equation YULIN ZHOU AND BOLING GUO	91

Parallel Invited Talks

Stability of boundary integral methods for water waves J. THOMAS BEALE, THOMAS Y. HOU, AND JOHN LOWENGRUB	107
On the compactly supported solutions of KPP or Fischer type equations Z. BIRO AND R. KERSNER	129
Delta waves in solutions of conservation laws TUNG CHANG (TONG ZHANG) AND SHULI YANG	139
Solution to M-D Riemann problems for quasilinear hyperbolic system of proportional conservation laws CHEN SHUXING	157
Contributions to the mathematical theory of magnetohydrodynamic shock waves HEINRICH FREISTÜHLER	175
Necessary and sufficient conditions of extinction and blow-up on some parabolic equations YONGGENG GU	189
Analytic solutions of Belousov-Zhabotinskii reaction GUO BEN-YU AND CHEN ZHI-XIONG	199
The global attractors for the Landau-Lifshitz equation of the Ferromagnetic spin chain on compact manifolds GUO BOLING, HONG MIN-CHUN, AND SU FENGQIU	213
Discontinuous solutions of the Navier-Stokes equations for multidimen- sional, compressible flow DAVID HOFF	229
Global existence and qualitative behavior of solutions for the system of compressible adiabatic flow with damping L. HSIAO	237
Slow dynamics of linear waves in nonlinear systems of conservation laws F. HUBERT AND D. SERRE	247
A study of the global weak solution for the isentropic equations of a poly- tropic gas A. JEFFREY AND Y. G. LU	261
Smooth shock profiles in viscoelasticity with memory SHUICHI KAWASHIMA AND HARUMI HATTORI	271

Weak linear degeneracy and global existence of classical solutions for quasi-linear hyperbolic systems LI TA-TSIEN, ZHOU YI, AND KONG DE-XING	283
Survey of vacuum theory and conjecture LONGWEI LIN	293
The initial value problem of a system of conservation laws PEIZHU LUO	307
Entropy solutions for a hydrodynamic model for semiconductors P. A. MARCATI AND R. NATALINI	311
A survey on stability of viscous shock profiles without genuine nonlinearity AKITAKA MATSUMURA	319
Asymptotic configuration of stationary interfacial patterns for reaction diffusion systems YASUMASA NISHIURA AND HIROMASA SUZUKI	333
A symplectic difference scheme for the PDEs QIN MENGZHAO	349
The essence of Glimm's scheme STEVEN SCHOCHET	355
Nonlinear Galerkin method using Legendre polynomials JIE SHEN AND ROGER TEMAM	363
Multi-dimensional shock-waves for relativistic fluids JOEL SMOLLER AND BLAKE TEMPLE	377
Nonlinear system of equations of mixed type and nonlinear complex equation of mixed type SUN HESHENG	393
On the stability of Broadwell shocks ANDERS SZEPESSY	403
Riemann problem for hyperbolic combustion DECHUN TAN	413
Optimal error estimates for viscosity method and monotone scheme to Riemann problem TENG ZHEN-HUAN	419
A new framework of nonlinear hydrodynamics JIANGHANG WU	433

Shock and boundary layer behavior of solutions to the Broadwell equation in the fluid dynamic limit ZHOU PING XIN	455
A new proof of existence of the wave front solutions for a kind of reaction-diffusion system ZHOU LI AND YA I. KANEL	469
<i>Contributions</i>	
Resonances of the Schwarzschild metric AGNES MOTET-BACHELOT	483
Scattering operator for the Klein-Gordon equation on the Schwarzschild metric ALAIN BACHELOT	489
Periodic boundary value problem and Cauchy problem for generalized IMBq equation with several variables GUOWANG CHEN AND ZHIJIAN YANG	495
A degenerate reaction-diffusion problem ZUCHI CHEN AND XIANGDONG CHEN	501
Cauchy problem for strongly damped nonlinear wave equations ENGUI FAN AND YUNBO WANG	505
Systems of quasilinear hyperbolic equations with quadratic coupling B. HANOZET AND R. NATALINI	509
Large time step Glimm's and Godunov's schemes and their entropy consistency JINYANG HUANG	515
Nonlinear Galerkin method for Navier-Stokes equations with stream form LI KAITAI, MA YICHEN, AND FENG WEIBING	521
A combined spectral-finite element method for a type of nonlinear two-dimensional Schrödinger equation XIAO-QING LIU AND SHENG-CHANG WU	527
Cauchy problem of nonisentropic gas dynamics equations LIU FAGUI	533
Existence and uniqueness of global solution for certain degenerate reaction-diffusion systems LU GUO-FU	537

On the spherically symmetric motion of self-gravitating isentropic gas surrounding a solid ball TETU MAKINO	543
Dynamics on the attractor for reaction-diffusion systems in higher space dimensions YOSHIOHISA MORITA	547
Finite dimensionality of attractors of magnetic flow equation QU CHAOCHUN AND CHEN FENGXIN	553
On a complex dynamical and dissipative structure of partial differential equations SZE KUI NG	559
Global behavior of positive solutions to quasilinear parabolic equation with nonlinear boundary absorption MING-XIN WANG	565
Interaction of three progressing waves with different singularities for semi-linear wave equations WANG WEIKE	571
The bidimensional Stefan problem with nonlinear convection WANG XUEFENG	577
Some problems on semiconductor equations WANG YUANMING AND GUAN PING	583
Existence and nonexistence of global solution of nonlinear parabolic equation with nonlinear boundary condition WU YONG-HUI AND WANG MING-XIN	589
Spirals for Riemann problems in multipieces for 2-D Euler equations by using MmB schemes SHULI YANG	595
Global existence of solutions for the reaction-diffusion systems which don't satisfy a zero sum condition YANG WANLI	601
Nonexistence of global solutions to a class of generalized improved Boussinesq equations ZHIJIAN YANG AND GUOWANG CHEN	607
Zeros of solutions of hyperbolic equations with functional arguments NORIO YOSHIDA	613

Existence and convergence of solutions to higher order generalized KDV-Burgers equations HUIJIANG ZHAO, CHANGJIANG ZHU, AND ZHONG YU	619
Convergence and error bound analysis of a finite-difference scheme for the one-dimensional Navier-Stokes equations JENNIFER JING ZHAO AND DAVID HOFF	625
Vacuum problem for the damped p-system YONG-SHU ZHENG	633
