Preface

C Amrouche, V Girault and J Giroire Calderón–Zygmund inequalities, Riesz potentials and Riesz transforms in weighted Sobolev spaces	1
N André Nonuniqueness results for quasilinear elliptic systems	16
S N Antontsev, J I Diaz and S I Shmarev The support shrinking in solutions of parabolic equations with non-homogeneous absorption terms	24
D Z Arov, I P Gavrilyuk and V L Makarov Representation and approximation of solutions of initial value problems for differential equations in Hilbert space based on the Cayley transform	40
J Carrillo and A Alonso A unified formulation for the boundary conditions in some convection-diffusion problem	51
M Chipot and A Lyaghfour An existence theorem for an unbounded dam with leaky boundary conditions	64
M Choulli and R Deville Local weak solutions for a multivalued evolution equation	74
P Colli and M Grasselli Nonlinear parabolic problems modelling transition dynamics with memory	82
J Escher and G Simonett On a multi-dimensional moving boundary problem	98
A L Gladkov Cauchy problem for equations of nonlinear heat conductivity with convection in classes of growing functions	106

A Ito, N Kenmochi and M Niezgódk	
Large-time behaviour of non-isothermal models for phase separation	120
V L Kamynin	
On convergence of the solutions of inverse problems for parabolic equations with weakly converging coefficients	130
J Popiołek	
On the Airy equation with a coefficient depending on t	152
W Reichel	
Radial symmetry by moving planes for semilinear elliptic BVPs on annuli and other non-convex domains	164
N Sato, J Shirohzu and N Kenmochi	
Large-time behavior of the solution to a phase change problem with constraint	183
A Simon	
Entire positive solutions for semi-linear elliptic functions	195
I V Skrypnik	
On quasilinear parabolic higher order equations with Hölder continuous solutions	203
M A Vivaldi	
Existence and uniqueness results for degenerate-elliptic integro-differential problems	213
A I Volpert and V A Volpert	
Application of the Leray-Schauder degree to investigation of travelling wave solutions of parabolic equations	224
H F Weinberger	
Degenerate elliptic models for perfectly plastic flows	240
E Zuazua	
Some recent results on the large time behavior for scalar parabolic conservation laws	251
