

CONTENTS

I ENGINEERING VIEWPOINTS

<i>T.S. Wilkinson</i> (invited speaker) Mathematics for engineers: an industrial view	3
<i>G.W.S. Lockyer</i> (invited speaker) The product of experience	15
<i>H. Marsh</i> (invited speaker) The challenge of change	21
<i>B.R. Clayton</i> (invited speaker) Mathematics for engineers: an integrated approach	29
<i>D.A. Nethercot</i> (invited speaker) Numeracy for civil engineers	45
<i>S.C. Dunn</i> (invited speaker) IEE accreditation and mathematics	53

II EDUCATIONAL BACKDROP

<i>M.T. Deere</i> (invited speaker) Signpost or fence? - changing qualifications in post-compulsory education	63
<i>T.D. Scott and J.W. Searl</i> (invited speakers) Mathematical education of 12-18 year olds in Scotland	71
<i>D.J.G. James</i> Implications of trends in education on the mathematical content of engineering degree courses	77
<i>M.D.J. Barry</i> A core curriculum in mathematics for the student engineer	97
<i>N.M. Stavrakakis</i> Mathematical education in Greek technical universities	103
<i>R.C. McGregor and B.F. Scott</i> A view on applicable mathematics courses for engineers	115

III ISSUES OF WIDER ACCESS

- I.C. Evans and J.A. Brandon*
Mathematical education of engineering foundation students 133
- L.R. Mustoe*
Mathematics in a foundation year 143
- G. Orme and R.P. Penson*
Foundation mathematics 155
- C.T. Shaw and V.F. Shaw*
Mathematics for first year engineering students - student performance and attitudes 161
- A.R. Johnson and R.J. Atkin*
Mathematics teaching for BTEC and A level entrants on a mechanical engineering degree course 175
- J.C. Appleby, A. Anderson and P. Fletcher*
Diagnosis and treatment of students from varied backgrounds 193
- D.A. Lawson, J.H. Tabor and A. Whitehead*
The implications of the spread of entry qualifications of engineering undergraduates 201
- D.N. Hunt, J.H. Tabor and A. Whitehead*
Mathematics entry qualifications to engineering courses and the effect on first year results 217
- A.R. Fleming*
Quality and quantity - the challenge of wider access 233

IV TEACHING EXPERIENCES

- D.C. Pountney, I.S. Jones and M.S. Townend*
Engineering mathematics - 1.137 litres into a 0.568 litre pot? 241
- W. Cox, W.T. Norris and J.E.T. Penny*
Mathematics in engineering teaching at university - a practitioner's dilemma 251
- J.C. Appleby*
"Making do" in mathematical modelling - what can be done with limited resources 267

<i>A.L. Worthy</i> The teaching of maths to engineers: its past, present and future at Wollongong University	277
<i>R.F.D. Ranzetta</i> Coping with outcome-based learning	287
<i>R. Davison and A. Croft</i> Learning from base groups and from a plan	293
<i>S. Starkings</i> Mathematics in computing courses within the engineering faculty	301
V COMPUTERS IN TEACHING AND ASSESSMENT	
<i>S. Hibberd</i> The mathematical assessment of students entering university engineering courses	313
<i>D.A.S. Curran and W. Middleton</i> A computer-based mathematics curriculum for engineers	331
<i>A.R. Johnson, J.M. Moffat and R.A. Wilson</i> Mathematics support for engineering CAL	347
<i>P.M. Bishop, M. Bhatt, A. Hayes, P. Kent, P. Ramsden and M.H. Beilby</i> Computers in the teaching of mathematics to engineers - a summary of presentations	353
VI EPILOGUE	
<i>J.P. O'Kane (invited speaker)</i> Engineers and their mathematicians - foundations for a debate on mathematics in the engineering curriculum	361
<i>M.J. O'Carroll</i> Conclusions after a decade of decline	379
