

Table of contents

Foreword	vii
List of Participants	viii
Titles of Talks	xii
M. Arkowitz and G. Lupton , <i>On the nilpotency of subgroups of self-homotopy equivalences</i>	1
D. Arlettaz and P. Zelewski , <i>Linear group homology properties of the inclusion of a ring of integers into a number field</i>	23
A. K. Bousfield , <i>Unstable localization and periodicity</i>	33
M. Brunetti , <i>On the canonical $GL_2(\mathbb{F}_2)$-module structure of $K(n)^*(B\mathbb{Z}/2 \times B\mathbb{Z}/2)$</i>	51
A. Cavicchioli and F. Hegenbarth , <i>Manifolds with highly connected universal covers</i>	61
B. Cenkli and M. Vigué-Poirrier , <i>Hochschild and cyclic homology of an almost commutative cochain algebra associated to a nilmanifold</i>	69
W. Chachólski , <i>Closed classes</i>	95
F. R. Cohen , <i>On mapping class groups from a homotopy theoretic point of view</i>	119
M. C. Crabb and J. R. Hubbuck , <i>Representations of the homology of BV and the Steenrod algebra II</i>	143
K. Dekimpe and P. Igodt , <i>Polynomial structures for iterated central extensions of abelian-by-nilpotent groups</i>	155
W. G. Dwyer , <i>The centralizer decomposition of BG</i>	167
H. H. Glover, I. J. Leary, and C. B. Thomas , <i>The Yagita invariant of general linear groups</i>	185
I. M. James , <i>Fibrewise complexes</i>	193
A. Jeanneret, P. S. Landweber, and D. C. Ravenel , <i>A note on the thick subcategory theorem</i>	201
T. Kashiwabara, N. Strickland, and P. Turner , <i>The Morava K-theory Hopf ring for BP</i>	209

K. Y. Lam and D. Randall , <i>Periodicity of geometric dimension for real projective spaces</i>	223
L. Langsetmo , <i>Further structure in $K(1)_*\Omega^k S^{2n+1}$</i>	235
J. Lannes and S. Zarati , <i>Tor et Ext-dimensions des H^*V-A-modules instables qui sont de type fini comme H^*V-modules</i>	241
I. J. Leary , <i>A bound on the exponent of the cohomology of BC-bundles</i>	255
R. Levi , <i>A counter-example to a conjecture of Cohen</i>	261
I. Llerena and N. H. V. Hu'ng , <i>The complete Steenrod algebra and the generalized Dickson algebra</i>	271
C. A. McGibbon , <i>On the localization genus of a space</i>	285
J. M. Møller , <i>Extensions of p-compact groups</i>	307
A. Nofech , <i>A version of an E^2 closed model category structure</i>	329
D. Notbohm , <i>p-adic lattices of pseudo reflection groups</i>	337
E. Ossa , <i>On the cohomology of configuration spaces</i>	353
A. Osse , <i>On isomorphism classes of locally unitary groups</i>	363
G. Peschke , <i>Localization and genus in group theory and homotopy theory</i>	381
Y. Xia , <i>On the connectivity of posets in the mapping class group</i>	393
