

TABLE OF CONTENTS

Roland DOBRUSHIN : "PERTURBATION METHODS OF THE THEORY OF GIBBSIAN FIELDS"	1
1. Introduction	1
2. Kotezky - Preiss animal model - Definition	2
3. Reduction to the animal model - Polymer models	5
4. Reduction to the animal model - Inhomogeneous Markov chains	8
5. Reduction to the animal model - Ising model	16
6. Analyticity in the Kotezky-Preiss model	27
7. Central limit theorem	30
8. Semiinvariants	37
9. Virial expansion and infinite-volume Probabilities for high-temperature Ising model	40
10. Cluster expansion in animal models	46
11. Extension of the domain of analyticity for Markov Chains	48
12. Additive functionals	52
13. Markov chains with a general space of states	54
14. Kantorovich distance and its applications	57
References	
Piet GROENEBOOM : "LECTURES ON INVERSE PROBLEMS"	67
Introduction	68
1. Some examples of inverse statistical problems	72
1.1 The interval censoring problem	72
1.2 Regression models with interval censoring	74
1.3 Deconvolution	75
1.4 Wicksell's problem	76
1.5 Hampel's migrating birds problem (convex densities)	77
2. Algorithms	78
2.1 The self-consistency equation and the EM algorithm	78
2.2 Self-consistency of the NPMLE for interval censoring, case 1	78
2.3 Convex envelope algorithms	81

3.	Smooth functionals	97
3.1	Pathwise differentiable functionals ; asymptotic efficiency	97
3.2	Information bounds under transformations	100
3.3	Implicitly defined pathwise differentiable functionals	101
3.4	Interval censoring, case 1 (current status data)	106
3.5	Interval censoring, case 2 ; lower bound	107
3.6	Asymptotic efficiency of the NPMLE	116
3.7	Simulations	128
4.	Local behavior	132
4.1	Minimax results	132
4.2	Local asymptotic distribution theory	136
 Michel LEDOUX : "ISOPERIMETRY AND GAUSSIAN ANALYSIS"		 165
1.	Some isoperimetric inequalities	170
2.	The concentration of measure phenomenon	178
3.	Isoperimetric and concentration inequalities for product measures	188
4.	Integrability and large deviations of Gaussian measures	202
5.	Large deviations of Wiener chaos	223
6.	Regularity of Gaussian processes	233
7.	Small ball probabilities for Gaussian measures and related inequalities and applications	246
8.	Isoperimetry and hypercontractivity	264
