

Contents

Preface	vii
Symmetries in dynamical systems	
Thomas J. Bridges <i>Symplecticity, reversibility and elliptic operators</i>	1
R. Cushman, J. Hermans, D. Kemppainen <i>The Rolling Disc</i>	21
Karin Gatermann <i>Testing for S_n-Symmetry with a Recursive Detective</i>	61
I.U. Bronstein, A.Ya. Kopanskii <i>Normal forms of vector fields satisfying certain geometric conditions</i>	79
Jeroen S.W. Lamb, Matthew Nicol <i>On symmetric ω-limit sets in reversible flows</i>	103
Reiner Lauterbach <i>Symmetry Breaking in Dynamical Systems</i>	121
Matthias Rumberger , Jürgen Scheurle <i>Invariant C^j functions and center manifold reduction</i>	145
Jürgen Knobloch, André Vanderbauwhede <i>Hopf bifurcation at k-fold resonances in conservative systems</i>	155
KAM theory and other perturbation theories	
H.W. Broer, G.B. Huitema, M.B. Sevryuk <i>Families of Quasi-Periodic Motions in Dynamical Systems Depending on Parameters</i>	171
John Guckenheimer <i>Towards a Global Theory of Singularly Perturbed Dynamical Systems</i>	213
Heinz Hanßmann <i>Equivariant Perturbations of the Euler Top</i>	227
A. I. Neishtadt, C. Simó and D. V. Treschev <i>On stability loss delay for a periodic trajectory</i>	253
M. Ruijgrok, F. Verhulst <i>Parametric and autoparametric resonance</i>	279
Marcelo Viana <i>Global attractors and bifurcations</i>	299

Infinite dimensional systems

Stephan A. van Gils, Edy Soewono	
<i>Modulated waves in a perturbed Korteweg-de Vries equation</i>	325
E.R. Fledderus, E. van Groesen	
<i>Hamiltonian Perturbation Theory for Concentrated Structures in Inhomogeneous Media</i>	347
Xianhua Huang	
<i>On instability of minimal foliations for a variational problem on T^2</i>	373
Xiao-Biao Lin	
<i>Local and Global Existence of Multiple Waves Near Formal Approximations</i>	385

Time series analysis

Floris Takens	
<i>Estimation of dimension and order of time series</i>	405

Numerical continuation and bifurcation analysis

H.W. Broer, H.M. Osinga, G. Vegter	
<i>On the computation of normally hyperbolic invariant manifolds</i>	423
Michael Dellnitz, Andreas Hohmann	
<i>The Computation of Unstable Manifolds Using Subdivision and Continuation</i>	449
