

Contents of Volume 1

Contents of Volume 2	vii
Preface	ix
List of Participants	xi
Evening Programs	xiii
K. Alladi	1
<i>Weighted partition identities and applications</i>	
G. E. Andrews	17
<i>Rogers-Ramanujan polynomials for modulus 6</i>	
J. Bae	31
<i>On subset-sum-distinct sequences</i>	
R. C. Baker and G. Harman	39
<i>The Brun-Titchmarsh Theorem on average</i>	
A. Balog, H. Darmon and K. Ono	105
<i>Congruences for Fourier coefficients of half-integral weight modular forms and special values of L-functions</i>	
P. T. Bateman	129
<i>The asymptotic formula for the number of representations of an integer as a sum of five squares</i>	
P. Bleher and J. Bourgain	141
<i>Distribution of the error term for the number of lattice points inside a shifted ball</i>	
N. Boston	155
<i>A probabilistic generalization of the Riemann zeta function</i>	
D. Bowman	163
<i>A general Heine transformation and symmetric polynomials of Rogers</i>	
D. Bradley	173
<i>A sieve auxiliary function</i>	
T. Cochrane	211
<i>Bounds on complete exponential sums</i>	
J. B. Conrey	225
<i>A note on the fourth power moment of the Riemann zeta-function</i>	
H. Daboussi	231
<i>Effective estimates of exponential sums over primes</i>	

H. Delange.....	245
<i>On products of multiplicative functions of absolute value at most 1 which are composed with linear functions</i>	
H. G. Diamond, H. Halberstam, and H.-E. Richert	265
<i>Combinatorial sieves of dimension exceeding one II</i>	
D. Eichhorn and K. Ono	309
<i>Congruences for partition functions</i>	
P.D.T.A. Elliott.....	323
<i>Fractional power large sieves</i>	
P. Erdős	333
<i>Some problems I presented or planned to present in my short talk</i>	
P. Erdős, S. W. Graham, A. Ivić and C. Pomerance.....	337
<i>On the number of divisors of $n!$</i>	
R. Evans.....	357
<i>Generalized Lambert series</i>	
M. Filaseta	371
<i>A generalization of an irreducibility theorem of I. Schur</i>	
J. Friedlander and H. Iwaniec	411
<i>Bombieri's sieve</i>	
S. W. Graham	431
<i>B_h sequences</i>	

Contents of Volume 2

D. R. Heath-Brown	451
<i>An estimate for Heilbronn's exponential sum</i>	
M. Helm	465
<i>On B_3 sequences</i>	
C. Hooley	471
<i>On an elementary inequality in the theory of Diophantine approximation</i>	
M. N. Huxley	487
<i>The integer points close to a curve II</i>	
M. Jutila	517
<i>The fourth moment of Riemann's zeta-function and the additive divisor problem</i>	
N. M. Katz and Z. Zheng	537
<i>On the uniform distribution of Gauss sums and Jacobi sums</i>	
M. N. Kolountzakis	559
<i>A problem of Steinhaus: Can all placements of a planar set contain exactly one lattice point?</i>	
X.-J. Li	567
<i>A note on the Riemann-Roch Theorem for function fields</i>	
J. Liu and T. Zhan	571
<i>Estimation of exponential sums over primes in short intervals II</i>	
L. Lucht and K. Reifenrath	607
<i>Weighted Wiener-Lévy theorems</i>	
W. Luo	621
<i>Spectral mean-values of automorphic L-functions at special points</i>	
H. Maier	633
<i>The size of the coefficients of cyclotomic polynomials</i>	
Y. Motohashi	641
<i>On Kuznetsov's trace formulae</i>	
M. R. Murty and C. S. Rajan	669
<i>Stronger multiplicity one theorems for forms of general type on GL_2</i>	

M. Nair and A. Perelli	685
<i>A sieve fundamental lemma for polynomials in two variables</i>	
C. Pomerance	703
<i>Multiplicative independence for random integers</i>	
R. A. Rankin	713
<i>On certain meromorphic modular forms</i>	
E. Scourfield	723
<i>Comparison of two dissimilar sums involving the largest prime factor of an integer</i>	
H. M. Stark	737
<i>On the determination of an L-function from one value</i>	
K. B. Stolarsky	745
<i>An approximation to the q-analogue of n involving the n-analogue of a golden number</i>	
R. C. Vaughan	755
<i>Small values of Dirichlet L-functions at 1</i>	
D. Wan	767
<i>Global zeta functions over number fields and function fields</i>	
S. Wong	777
<i>Consequences from the study of concentration functions on shifted twin primes</i>	
T. D. Wooley	803
<i>An affine slicing approach to certain paucity problems</i>	
L.-C. Zhang	817
<i>Ramanujan's class invariants, Kronecker's limit formula and modular equations (II)</i>	
W.-B. Zhang	839
<i>Probabilistic number theory in additive arithmetic semi-groups I</i>
