

Contents

Introduction	vii
Editors' Preface	viii
1. Disordered systems	
DMITRY IOFFE	
Extremality of the disordered state for the Ising model on general trees	3
STÉPHANE JAFFARD	
Trees in the time-scale domain	15
FLORA KOUKIOU	
Random measures on trees and thermodynamic formalism	25
2. Probability and trees	
JOHN BIGGINS, ANDREW KYPRIANOU	
Branching random walk: Seneta-Heyde norming	31
QUANSHENG LIU	
The growth of an entire characteristic function and the tail probabilities of the limit of a tree martingale	51
RUSSEL LYONS	
Probabilistic aspects of infinite trees and some applications	81
DIDIER PIAU	
Functional limit theorems for the simple random walk on a supercritical Galton-Watson tree	95
3. Ultrametric and algebraic aspects of trees	
FRANCIS CHOUCROUN	
Groupes d'automorphismes et frontières d'arbres: le cas homogène	109
GILLES CHRISTOL	
Trees and non-archimedean topologies	123
4. Large deviations	
ALBERT BENASSI	
Arbres et grandes déviations	135
NINA GANTERT	
Large deviation principle for random fields on a binary tree	141
List of Participants	149
