

CONTENTS

Preface	xi
1. Evolution of the Transporting Epithelium Phenotype	1
<i>Marcelino Cereijido, María del Refugio García-Villegas, Liora Shoshani and Rubén Gerardo Contreras</i>	
Experimental Approaches	4
The Development of Tight Junctions	4
The Development of Polarity: The Role of the β -Subunit of the Na^+, K^+ -ATPase	5
α/β -Subunit Interactions	6
Na^+, K^+ -ATPase, Cell Attachment and the Position of the TJ	6
Evolution of the Epithelial Vectorially Transporting Phenotype	8
Evolution of the Na^+, K^+ -ATPase	8
Evolution of Junction Proteins	9
The Dawn of Metazoans and Transporting Epithelia	11
Na^+, K^+ -ATPase and Cell Adhesion: Role of the β -Subunit in Cell Attachment	12
2. Occludin, a Constituent of Tight Junctions	19
<i>Yan-Hua Chen, Daniel A. Goodenough and Qun Lu</i>	
Identification of Occludin from Different Species	19
Localization of Occludin at TJs	20
Expression of Occludin in Vitro	21
Functional Analysis of Occludin Domains	22
Occludin Interacting Proteins	24
Roles of Occludin Phosphorylation	26
Regulation of Occludin by Signaling Molecules	27
Phenotypes of Occludin-Deficient Mice	28
Occludin in Cancer Cells	28
3. Tight Junction Channels	33
<i>James Melvin Anderson and Christina M. Van Itallie</i>	
Channel-Like Properties of Tight Junctions	33
The Claudin Family and Its Extended Relatives	34
Lessons from Cell Culture Models	37
Lessons from Heritable Human Diseases	38
Lessons from Mutant Mice	39
4. JAM Family Proteins: Tight Junction Proteins That Belong to the Immunoglobulin Superfamily	43
<i>Susumu Hirabayashi and Yutaka Hata</i>	
General Features of JAM Family Proteins	44
Functions of JAM Family Proteins	48

5. Cingulin, a Cytoskeleton-Associated Protein of the Tight Junction	54
<i>Laurent Guillemot and Sandra Citi</i>	
Identification of Cingulin as a Tight Junction-Associated Protein	54
Molecular Structure and Evolution of Cingulin	55
Interaction of Cingulin with the Actomyosin Cytoskeleton	57
Cingulin Associates with Several Tight Junction Proteins	57
The Head Domain of Cingulin Is Essential for Its Junctional Recruitment	57
Cingulin Is Maternally Expressed and Is an Early Component of Cell-Cell Junctions in Developing Vertebrate Embryos	58
Cingulin as a Marker for Differentiated Epithelial Cells	60
Putative Functions and Regulation of Cingulin	60
Paracingulin	61
6. ZO Proteins and Tight Junction Assembly	64
<i>Alan S. Fanning</i>	
Role as Molecular Scaffold of Tight Junction Proteins	65
ZO Proteins as Cytoskeletal Linkers	67
Organization of Signal Transduction Pathways and Transcription Factor Complexes That Regulate Junction Structure and Function	68
Extension of the Paradigm: ZO Proteins and Global Organization of Cell-Cell Junctions	70
7. TJ Proteins That Make Round Trips to the Nucleus	76
<i>Esther Lopez-Bayghen, Blanca Estela Jaramillo, Miriam Huerta, Abigail Betanzos and Lorenza Gonzalez-Mariscal</i>	
TJ Proteins Participate in Maintaining the Equilibrium between Proliferation and Differentiation	76
Conditions Upon Which TJ Proteins Are Found at the Nucleus	77
Signals Contained in the Sequence of TJ Proteins That Facilitate Membrane-Nuclear Shuttling	80
A Protein Involved in Chromatin Remodeling Colocalizes with ZO-1 at the TJ	86
Nuclear Matrix and TJ Proteins	89
Interaction of TJ Cortical Proteins with Molecules Involved in RNA Processing and Transcriptosome Assembly	92
TJ Proteins Associate with Transcription Factors at the Nucleus and the Plasma Membrane	93

8. Tight Junctions and the Regulation of Epithelial Cell Proliferation and Gene Expression	101
<i>Emma Kavanagh, Anna Tsapara, Karl Matter and Maria S. Balda</i>	
Junctional Membrane Proteins	102
Junctional Plaque Proteins	102
ZO-1 and ZONAB in the Regulation of Cell Proliferation	105
ZONAB and the Regulation of Gene Expression	107
Tight Junctions and the Ras Pathway in the Regulation of Cell Proliferation	108
9. Tight Junction Proteins and Cancer	116
<i>Isabel J. Latorre, Kristopher K. Frese and Ronald T. Javier</i>	
TJ Proteins	117
TJ Proteins and Cancer	118
The TJ and Viral Oncoproteins	124
10. Regulation of Paracellular Transport across Tight Junctions by the Actin Cytoskeleton	135
<i>Matthias Bruewer and Asma Nusrat</i>	
Modulation of Myosin Light Chain-Phosphorylation in the Perijunctional F-Actin Ring Influences TJ Function	136
Modulation of Barrier Function by Rho GTPases	137
Modulation of Barrier Function by Cytokines	139
11. Regulation of Tight Junctions' Functional Integrity: Role of a Urinary Factor, Lipids and Ouabain	146
<i>Liora Shoshani, David Flores-Bentitez, Lorenza Gonzalez-Mariscal and Rubén Gerardo Contreras</i>	
Regulatory Factors of the Tight Junctions	147
Urinary Factors	149
Lipids	152
Ouabain	155
12. Tight Junctions during Development	164
<i>Bhavwanti Sheth, Judith Eckert, Fay Thomas and Tom P. Fleming</i>	
Epithelial Differentiation in the Mouse Embryo	165
Compaction: A Prerequisite for Tight Junction Formation	166
Three Phases of Tight Junction Biogenesis	166
Cell Adhesion and Regulation of Tight Junction Assembly	169
Tight Junctions in Other Mammalian Preimplantation Embryos	170

13. Tight Junctions and the Blood-Brain Barrier	175
<i>Hartwig Wolburg, Andrea Lippoldt and Klaus Ebnet</i>	
Structure of Blood-Brain Barrier Tight Junctions	176
Molecular Composition of Blood-Brain Barrier Tight Junctions	178
Regulatory Mechanisms in the Blood-Brain Barrier	184
14. Tight Junctions in CNS Myelin	196
<i>Jeff M. Bronstein and Seema Tiwari-Woodruff</i>	
The Radial Component of CNS Myelin Are Tight Junctions	196
OSP/Claudin-11 Is Essential for the Formation of CNS Myelin TJs	197
Myelin Compaction Is Dependent on Both OSP/Claudin-11 and PLP/DM20	199
Regulation of Migration and Proliferation; OSP/Claudin-11 and Associated Proteins	201
15. Tight Junction Modulation and Its Relationship to Drug Delivery	206
<i>Noha N. Salama, Natalie D. Eddington and Alessio Fasano</i>	
The Paracellular Route	207
Structural Characteristics of Tight Junctions	207
Enhancing Drug Delivery via Modulation of the TJs	209
Discovery of Zonula Occludens Toxin	210
Insights into the Zonulin System	211
Identification of the Zot Receptors	211
Zot as a TJ Modulator for Improved Drug Delivery	212
Index	221
