

# Contents

Preface . . . . .	vii
<b>I GENERAL CONCEPTS</b>	<b>1</b>
1 The Role of Modeling in Systems Biology . . . . . <i>Douglas B. Kell and Joshua D. Knowles</i>	3
2 Complexity and Robustness of Cellular Systems . . . . . <i>Jörg Stelling, Uwe Sauer, Francis J. Doyle III, and John Doyle</i>	19
3 On Modules and Modularity . . . . . <i>Zoltan Szallasi, Vipul Periwal, and Jörg Stelling</i>	41
<b>II MODELING APPROACHES</b>	<b>51</b>
4 Bayesian Inference of Biological Systems: The Logic of Biology <i>Vipul Periwal</i>	53
5 Stoichiometric and Constraint-based Modeling . . . . . <i>Steffen Klamt and Jörg Stelling</i>	73
6 Modeling Molecular Interaction Networks with Nonlinear Ordinary Differential Equations . . . . . <i>Emery D. Conrad and John J. Tyson</i>	97
7 Qualitative Approaches to the Analysis of Genetic Regulatory Networks . . . . . <i>Hidde de Jong and Delphine Ropers</i>	125
8 Stochastic Modeling of Intracellular Kinetics . . . . . <i>Johan Paulsson and Johan Elf</i>	149
9 Kinetics in Spatially Extended Systems . . . . . <i>Karsten Kruse and Johan Elf</i>	177

<b>III MODELS AND REALITY</b>	<b>199</b>
<b>10 Biological Data Acquisition for System Level Modeling— An Exercise in the Art of Compromise . . . . .</b>	<b>201</b>
<i>Zoltan Szallasi</i>	
<b>11 Methods to Identify Cellular Architecture and Dynamics from Experimental Data . . . . .</b>	<b>221</b>
<i>Rudiyanto Gunawan, Kapil G. Gadkar, and Francis J. Doyle III</i>	
<b>12 Using Control Theory to Study Biology . . . . .</b>	<b>243</b>
<i>Brian P. Ingalls, Tau-Mu Yi, and Pablo A. Iglesias</i>	
<b>13 Synthetic Gene Regulatory Systems . . . . .</b>	<b>269</b>
<i>Mads Kærn and Ron Weiss</i>	
<b>14 Multilevel Modeling in Systems Biology: From Cells to Whole Organs . . . . .</b>	<b>297</b>
<i>Denis Noble</i>	
<b>IV COMPUTATIONAL MODELING</b>	<b>313</b>
<b>15 Computational Constraints on Modeling in Systems Biology .</b>	<b>315</b>
<i>Vipul Periwal</i>	
<b>16 Numerical Simulation for Biochemical Kinetics . . . . .</b>	<b>331</b>
<i>Daniel T. Gillespie and Linda R. Petzold</i>	
<b>17 Software Infrastructure for Effective Communication and Reuse of Computational Models . . . . .</b>	<b>355</b>
<i>Andrew Finney, Michael Hucka, Benjamin J. Bornstein, Sarah M. Keating, Bruce E. Shapiro, Joanne Matthews, Ben L. Kovitz, Maria J. Schulstra, Akira Funahashi, John Doyle, and Hiroaki Kitano</i>	
<b>A Software Tools for Biological Modeling . . . . .</b>	<b>379</b>
<b>References . . . . .</b>	<b>385</b>
<b>Contributors . . . . .</b>	<b>435</b>
<b>Index . . . . .</b>	<b>439</b>
