

# Table of Contents

1	Introduction	15
1.1	Objectives	16
1.2	Definition of the target group	17
1.3	Methods	18
1.3.1	Questionnaire among the 25 member states of the European Union	19
1.3.2	Questionnaire among female drug users in prison	21
2	Literature review on “drugs & prison”	25
2.1	Problem definition	25
2.2	Characteristics of female drug using prisoners	27
2.3	Health and social problems of female drug users entering prison	27
2.3.1	Drug use and health risks in prison	29
2.4	Drug and treatment services for drug using women in prison	33
2.5	Evaluation results of intervention programmes	37
2.5.1	Impact of intervention programmes on relapse prevention	38
2.5.2	Gender specific needs and barriers for relapse prevention	40
2.5.3	Assessment of best practice based on evaluation results	41
3	Results of the European prison survey	43
3.1	Introduction	43
3.2	Prison population of the 25 member states of the European Union	44
3.3	Adult female prisoners in Europe	46
3.3.1	Prevalence of adult female drug users in European prisons	49
3.3.2	Assessment of drug-related problems in prison	57

3.4	Provision of drug and treatment services in European prisons	62
3.4.1	Country specific comparison of available drug services in prison	67
3.4.2	Pre- and post-release services for female drug users	84
3.5	Quality assurance of drug care in prison	87
3.6	Future requirements for drug services in prison	91
4	Description of the prison settings	97
4.1	Hamburg – the prison Hahnöfersand	97
4.2	Barcelona – the prisons Brians and Wad-Ras	101
4.3	Glasgow – the prison Cornton Vale	103
4.4	Vienna – the prisons Favoriten and Schwarzwau	106
4.5	Warsaw – the prison Lubliniec	110
5	Female drug using prisoners in five European cities: Results of the questionnaires	113
5.1	Social profile of female drug using prisoners	114
5.1.1	Summary	120
5.2	Delinquency and previous imprisonment	121
5.2.1	Illegal activities and reasons for current imprisonment	121
5.2.2	Lifetime prevalence of prison sentences	129
5.2.3	Summary	139
5.3	Patterns of drug use outside and inside prison	142
5.3.1	Drug use in the month before entering prison	146
5.3.2	Drug use since being in prison	157
5.3.3	Methadone maintenance treatment in prison	163
5.3.4	Summary	165
5.4	Health and social functioning in prison	168
5.4.1	Psychosocial distress of the women	170
5.4.2	Social contacts before and since entering prison	175
5.4.3	Summary	182
5.5	Utilisation of drug services outside and inside prison	184

5.5.1	Previous utilisation of community drug services	185
5.5.2	Utilisation of drug services while in prison	190
5.5.3	Access to drug and treatment services while in prison	201
5.5.4	Satisfaction with drug and treatment services while in prison	203
5.5.5	Further drug and treatment services needed in prison	212
5.5.6	Summary	217
5.6	Utilisation of release services and plans for the time after prison release	219
5.6.1	Utilisation and assessment of pre-release services	219
5.6.2	Future plans and support needs for rehabilitation	226
5.6.3	The women's confidence to realise future plans	233
5.6.4	Summary	235
6	Recommendations	237
	References	245
	Prison websites in Europe	257

## Tables

Table 1-1: Responses to the Prison Service Survey Questionnaire	20
Table 1-2: Recruited sample	24
Table 3-3: Prison population in the 25 member states of the European Union – an update of 2005	45
Table 3-4: Number of penal institutions for adult female prisoners and number of female prisoners – (n=27)	47
Table 3-5: Country-by-country availability of harm-reduction services – (n=27)	69
Table 3-6: Country-by-country availability of drug treatment services – (n=27)	76
Table 3-7: Country-by-country availability of pre-and post-release services – (n=27)	86
Table 3-8: Implementation of additional drug services in the near future – (n=11)	96
Table 5-9: Social profile of female drug using prisoners – (n=185)	115
Table 5-10: Age at first imprisonment and overall duration of previous imprisonments	135
Table 5-11: Age at the beginning of regular drug use and years of drug use – (n=179)	144
Table 5-12: Drug use in the past 30 days before entering prison – (n=183)	148
Table 5-13: Main routes of administration in the past 30 days before entering prison – (n=164)	155
Table 5-14: Any use of illicit substances while in prison – (n=185)	160
Table 5-15: Available drug services in the ten European prisons involved	191
Table 5-16: Reasons for not utilising services while in prison – (n=42) multiple nominations	192
Table 5-17: Number of women who ever and currently utilised any service	193

Table 5-18: Access to drug services in prison – (n=175) – multiple nominations	202
Table 5-19: Benefits of participating in drug or treatment programmes – (n=137) multiple nominations	207
Table 5-20: Satisfaction with drug and treatment services: means (standard deviation) of the Treatment Perception Questionnaire	210
Table 5-21: Additional items on the impact of drug and treatment services	211
Table 5-22: Structural conditions of the discharge planning – (n=184)	220
Table 5-23: Available release services in the ten European prisons	221
Table 5-24: Satisfaction of the women with their preparation for release	226
Table 5-25: Existence of concrete plans for the time after prison release – (n=184)	228
Table 5-26: Self-reported confidence to realise future plans	234

## Figures

Figure 3-1: Proportion of female prisoners among the national prison populations – (n=27)	46
Figure 3-2: Percentage of adult female drug users on a specific date in 2002 – (n=17)	50
Figure 3-3: Trend in the proportion of imprisoned female drug users from 2001 to 2002 – (n=26)	52
Figure 3-4: Prevalence of illicit drug use among female drug using prisoners – (n=14)	54
Figure 3-5: Offences against the drug law as reasons for imprisonment – (n=13)	59
Figure 3-6: Average duration of imprisonment for female drug using prisoners – (n=27)	60

Figure 3-7: Major drug-related problems challenging the prison system – (n=26)	61
Figure 3-8: Availability of harm reduction services in prison – (n=27)	63
Figure 3-9: Availability of drug treatment services in prison – (n=27)	65
Figure 3-10: Number of available harm-reduction services according to groups	72
Figure 3-11: Number of available drug treatment services according to groups	80
Figure 3-12: Availability of pre- and post-release services – (n=27)	84
Figure 3-13: Treatment plan, guidelines and recommendations for care of female drug users in prison – (n=27)	88
Figure 3-14: Need of additional harm-reduction services – (n=12)	92
Figure 3-15: Need for additional drug treatment services – (n=9)	94
Figure 5-16: Usual accommodation in the past 12 months prior to prison – (n=185)	118
Figure 5-17: Total length of current prison sentences – (n=185)	119
Figure 5-18: Prevalence and frequency of illegal activities among female drug users in the past 30 days before entering prison	124
Figure 5-19: Reasons for the current imprisonment of the female drug users – (n=185)	127
Figure 5-20: Prevalence and number of previous convictions – (n=171)	130
Figure 5-21: Frequency of previous imprisonment on remand and in prison – (n=134)	133
Figure 5-22: Lapse of time since last prison release – (n=134)	138
Figure 5-23: Regular and daily drug use in the past 30 days before entering prison – (n=164)	153
Figure 5-24: Changes in the prevalence of any use of illicit drugs since entering prison – (n=185)	158
Figure 5-25: Maintenance treatment outside and inside prison – (n=185)	164
Figure 5-26: Prevalence of infections with hepatitis C and HIV – (n=184)	169
Figure 5-27: Sources of distress in the present situation – (n=185) multiple nominations	173

Figure 5-28: Frequency of contacts with children, partner and parents outside prison and since entering prison	178
Figure 5-29: Frequency of contacts with professionals outside prison and since entering prison	180
Figure 5-30: Utilisation of different drug services in the past year – (n=185) multiple nominations	186
Figure 5-31: Assessment of the experiences with drug services	189
Figure 5-32: Ever and current utilisation of available drug and treatment services in prison – multiple nominations	195
Figure 5-33: The women’s assessments of their relations with the staff	205
Figure 5-34: Further drug services that should be provided in prison	214
Figure 5-35: Utilisation of pre- and post-release services – (n=185) multiple nominations	223
Figure 5-36: Support needs to deal with problems faced after prison release – multiple nominations	230
