<b>List of contributors</b>	vii
<b>Preface</b>	xi
<b>Color plates</b>	xiii
<b>PART I EPIDEMIOLOGY</b>	<b>1</b>
1. Asthma exacerbations: the size of the problem <i>Anne E Tattersfield</i>	3
2. Definition of acute asthma exacerbations in adults and children: differentiating asthma exacerbations from poor asthma control <i>Helen K Reddel and Stephen D Vincent</i>	17
3. The socioeconomic impact of asthma exacerbations <i>Todd A Lee</i>	43
4. Seasonal patterns of asthma exacerbations <i>Neil W Johnston and Malcolm R Sears</i>	57
5. Etiology of asthma exacerbations in children: differences from adults <i>James E Gern</i>	77
6. Etiology of asthma exacerbations in adults: differences from children <i>Anoop J Chauhan, Simon Bourne and Sebastian L Johnston</i>	91
7. Modes of transmission of respiratory viral infections <i>M Patricia Fabian, James J McDevitt and Donald K Milton</i>	113
<b>PART II PATHOPHYSIOLOGY</b>	<b>127</b>
8. Mechanisms of asthma exacerbation <i>Anh L Innes and John V Fahy</i>	129
9. Virus induction of neurogenic inflammation and airway responsiveness <i>Giovanni Piedimonte</i>	143

10.	Susceptibility to asthma exacerbations: antiviral immunity and protection against asthma exacerbations <i>Marco Contoli, Luminita A Stanciu, Simon Message, Alberto Papi and Sebastian L Johnston</i>	167
11.	Pathophysiology. Lessons from human respiratory syncytial virus bronchiolitis and acute wheezing episodes in infants <i>Malcolm G Semple and Rosalind L Smyth</i>	187
<b>PART III IN VITRO EXPERIMENTAL MODELS OF ASTHMA EXACERBATIONS</b>		203
12.	<i>In vitro</i> models of bronchial epithelial cell infection <i>Peter AB Wark, Donna E Davies and Stephen T Holgate</i>	205
13.	<i>In vitro</i> models of macrophage infection <i>Vasile Laza-Stanca, Luminita A Stanciu and Sebastian L Johnston</i>	223
<b>PART IV IN VIVO EXPERIMENTAL MODELS OF ASTHMA EXACERBATIONS</b>		243
14.	Murine models of allergen exposure and virus infection <i>Azzeddine Dakhama and Erwin W Gelfand</i>	245
15.	Lessons from human experimental rhinovirus infection in combination with allergen exposure <i>Robert F Lemanske Jr and William W Busse</i>	265
<b>PART V TREATMENT AND PREVENTION OF ASTHMA EXACERBATIONS</b>		275
16.	Role of leukotriene antagonists in the treatment and prevention of acute asthma exacerbations <i>William W Storms and Jeffrey M Drazen</i>	277
17.	Treatment and prevention of asthma exacerbations: how good are inhaled corticosteroids alone at preventing asthma exacerbations? <i>Sara J Uekert, Robert F Lemanske Jr and William W Busse</i>	285
18.	Efficacy of inhaled corticosteroids/long-acting $\beta_2$ -agonist combinations in preventing asthma exacerbations <i>Paul M O'Byrne</i>	297
<b>PART VI DELIVERY OF CARE</b>		305
19.	Role of self-management in preventing asthma exacerbations <i>Heather Powell and Peter G Gibson</i>	307
20.	Psychosocial factors in severe asthma in adults <i>Jane R Smith and Brian DW Harrison</i>	321
	Index	345
