

## CONTENTS

A. А. АХУНДОВ, Обзор некоторых результатов по теории линейных дифференциальных уравнений неразрешенных относительно производной . . . . .	7-16
J. BAILLIEUL, Chaotic dynamics and nonlinear feedback control . . . . .	17-34
H. БЕНКЕР, Upper and lower bounds for minimal norm problems under linear constraints . . . . .	35-45
A. BENSOUSSAN, Semi-group methods in stochastic control . . . . .	47-58
L. D. ВЕРКОВИЦ, A penalty method for deriving necessary conditions in problems of optimal control . . . . .	59-79
A. А. ЧИКРИЙ, Дифференциальные игры с несколькими преследователями . . . . .	81-107
F. W. CLARKE, The dual action, optimal control, and generalized gradients . . . . .	109-119
P. E. CROUCH, Attitude control of spacecraft . . . . .	121-134
R. ДАТКО, The uniform exponential stability of certain linear processes in a Hilbert phase space . . . . .	135-146
M. C. DELFOUR, The product space approach in the state space theory of linear time-invariant differential systems with delays in state and control variables . . . . .	147-169
J. DOLEŽAL, Necessary conditions for Lipschitz continuous discrete control problems . . . . .	171-179
A. L. ДОНТЧЕВ, On the order reduction of optimal control systems . . . . .	181-198
T. E. DUNCAN, Estimation for linear pure delay time systems . . . . .	199-227
P. ГАБАСОВ, Некоторые задачи конструктивной теории оптимального управления . . . . .	229-254
R. KLÖTZLER, Flow problems and duality . . . . .	255-262
H.-U. KÜENLE, On $\epsilon$ -optimal strategies in discounted Markov games . . . . .	263-276
K. KUNISCH, Identification and estimation of parameters in abstract Cauchy problems . . . . .	277-298
J.-L. LIONS, Optimal control of non well-posed distributed systems . . . . .	299-311
P.-L. LIONS, Optimal stochastic control and Hamilton-Jacobi-Bellman equations . . . . .	313-318
S. ŁOJASIEWICZ, jr., Some theorems of Scorza Dragoni type for multifunctions with application to the problem of existence of solutions for differential multivalued equations. . . . .	625-643
K. MAGNUSSON, A. J. PRITCHARD, M. D. QUINN, The application of fixed point theorems to global nonlinear controllability problems . . . . .	319-344
P. MANDL, On self-optimizing control of Markov processes . . . . .	345-360
B. М. МАРЧЕНКО, Некоторые вопросы качественной теории управления линейными стационарными системами с последствием . . . . .	361-381

A. A. MARTYNYUK, On practical stability and optimal stabilization of controlled motion . . . . .	383-400
E. MIERSEMANN, Eigenvalue problems in convex sets . . . . .	401-408
F. MIGNOT and J. P. PUEL, Optimal control in some variational inequalities . . . . .	409-422
M. NISIO, Note on non-linear semigroups and free boundary problem for controlled Markov processes . . . . .	423-438
R. REMPALA, Dynamic family of multicommodity inventory problems . . . . .	439-452
W. RESPONDEK, Geometric methods in linearization of control systems . . . . .	453-467
S. ROLEWICZ, A method of reduction of constraints . . . . .	469-476
W. RÖMISCH, An approximation method in stochastic optimization and control . . . . .	477-490
B. RZEPECKI, A note on the trajectories of a class of hereditary systems . . . . .	491-500
G. SONNEVEND, An optimal sequential algorithm for the uniform approximation of convex functions on $[0, 1]^2$ . . . . .	501-514
H. J. SUSSMANN, Lie brackets and real analyticity in control theory . . . . .	515-542
R. TICHATSCHKE, Semi-infinite programming problems . . . . .	543-554
V. M. VELIOV, Convergence rate of the solutions of singularly perturbed time-optimal control problems . . . . .	555-567
J. L. WILLEMS, LQ-optimal control with stabilization constraints . . . . .	569-579
L. v. WOLFERSDORF, On bang-bang principles in linear-quadratic control problems for generalized analytic functions . . . . .	581-590
J. ZABCZYK, Structural properties and limit behaviour of linear stochastic systems in Hilbert spaces . . . . .	591-609
T. ZOLEZZI, Variational stability and well-posedness in the optimal control of ordinary differential equations . . . . .	611-623
