

# Contents

Author's preface .....	vii
1. Picard's great theorem .....	1
2. On Holmgren's uniqueness theorem .....	9
3. The Phragmén-Lindelöf principle .....	15
4. Nevanlinna theory .....	23
5. The Riesz-Thorin interpolation theorem .....	31
6. The Mathematics of Wiener's Tauberian theorem .....	37
7. The Tarski-Seidenberg theorem .....	49
8. Intrinsic hyperbolicity .....	55
9. Hypoellipticity .....	61
10. Dirichlet's problem and Gårding's inequality .....	65
11. A sharp form of Gårding's inequality .....	71
12. The impact of distributions in analysis .....	77
