Preface	ix
Chapter 1. Partial Differential Equations Related to the Gauss-Bonnet-Chern Integrand on 4-manifolds <i>Sun-Yung A. Chang and Paul C. Yang</i>	
Introduction	1
1. Finiteness of conformally flat structures	3
2. Background on $\sigma_2$	8
3. Deforming $\sigma_2$ to a positive function	16
4. Deforming $\sigma_2$ to a constant	22
Bibliography	29
Chapter 2. Geometry of, and via, Symmetries <i>Karsten Grove</i>	
Introduction	31
1. Geometry of isometry groups	32
2. Structure and classification program	35
3. Constructions and examples	39
4. Emergence of isometries	43
5. Open problems	47
Bibliography	51
Chapter 3. Lagrangian Cycles and Volume <i>Jon G. Wolfson</i>	
Introduction	55
1. The variational problem	55
2. Existence	64
3. Regularity: cones and monotonicity	74
Bibliography	85
