

Contents

Preface	vii
0.1. Notation	viii
Chapter 1. Elementary embeddings	1
1.1. Ultrapowers	1
1.2. Towers of measures	14
1.3. Tree representations (part I)	17
1.4. Extenders	25
1.5. Woodin cardinals	30
1.6. Generic ultrapowers	36
1.7. Trees and the nonstationary ideal	46
Chapter 2. The stationary tower	49
2.1. Generalized stationarity	49
2.2. Stationary tower embeddings	51
2.3. Completely Jónsson cardinals	55
2.4. Forcing applications	59
2.5. Wellfoundedness	61
2.6. Preserving Woodin cardinals	74
2.7. The countable tower	78
Chapter 3. Applications	85
3.1. Regularity properties and absoluteness	85
3.2. Σ_1^2 -absoluteness	93
3.3. Tree representations (part II)	97
3.4. Fixing the theory of the universally Baire sets	106
Appendix: Forcing prerequisites	123
Bibliography	127
Index	131
