

Table of contents

Introduction: UG and external systems <i>Anna Maria Di Sciullo</i>	vii
Language	
Depictives <i>Daniela Isac</i>	3
On two issues related to the clitic clusters in Romance languages <i>Stanca Somesfalean</i>	27
On the question of (non)-agreement in the uses of Russian imperatives <i>Edit Jakab</i>	55
Computational puzzles of conditional clause preposing <i>Nicola Munaro</i>	73
Clefts and tense asymmetries <i>Manuela Ambar</i>	95
Generating configurational asymmetries in prosodic phonology <i>Evan W. Mellander</i>	129
Brain	
Language learnability and the forms of recursion <i>Thomas Roeper and William Snyder</i>	155
The autonomous contribution of syntax and pragmatics to the acquisition of the Hebrew definite article <i>Sharon Armon-Lotem and Idit Avram</i>	171
D(iscourse)-Linking and question formation <i>Helen Goodluck</i>	185
Evidence from ASL and ÖGS for asymmetries in UG <i>Ronnie B. Wilbur</i>	193

Acquisition of phonological empty categories <i>Ning Pan and William Snyder</i>	213
Prosodic cues during online processing of speech <i>Matt Bauer</i>	223
Computation	
Morpho-syntax parsing <i>Anna Maria Di Sciullo and Sandiway Fong</i>	247
A Minimalist implementation of Hale-Keyser incorporation theory <i>Sourabh Niyogi and Robert C. Berwick</i>	269
Minimalist languages and the correct prefix property <i>Henk Harkema</i>	289
Computation with probes and goals <i>Sandiway Fong</i>	311
Deep & shallow linguistically based parsing <i>Rodolfo Delmonte</i>	335
Towards a quantitative theory of variability <i>Philippe Blache</i>	375
Index	389
