

Contents

1	Introduction	1
1.1	Introduction to Reduced Order Systems	1
1.2	Background	2
1.3	Application Areas	4
1.4	Organization and Content	5
2	Static Problems.....	13
2.1	Introduction	13
2.2	Control Problems with Perfect Information	13
2.3	Control and Estimation with Imperfect Information	15
2.4	Best Linear Estimates	20
2.5	Linearized Applications	22
2.6	Partial Optimization	24
3	Stationary Processes	27
3.1	Introduction	27
3.2	Unbiased Linear Filters	27
3.3	Biased Linear Filters	31
3.4	Reduced Order Modeling	37
3.5	Stochastic Control	45
3.6	Controls Which Make Use of Estimates and Observations ...	50
3.7	A Discrete Control Problem	52
4	Estimation over Finite Time Intervals.....	59
4.1	Introduction	59
4.2	Optimal Unbiased Estimators of Fixed Order	59
4.3	Partial Optimization of Fixed Order Estimators ³	66
4.4	Joint Optimization of Both Filter Matrices	72
4.5	Reduced Order Modeling as a Design Aid	73
4.6	Generalized Reduced Order Modeling and Filtering	81

5	Smoothing	91
5.1	Introduction	91
5.2	The Reduced Order Smoothing Problem	91
5.3	The Backward Filter	92
5.4	The Optimal Reduced Order Smoother	94
5.5	Example of Reduced Order Smoother	95
5.6	Summary	97
6	Stochastic Control over Finite Time Intervals	99
6.1	Introduction	99
6.2	The Basic Stochastic control Problem	99
6.3	Stochastic Control in the Presence of Measurement Noise ...	103
7	Innovation Approach to Reduced Order Estimation	109
7.1	Introduction	109
7.2	A Static Problem	110
7.3	Reduced Order Wiener-Hopf Equation and the Innovation Process	114
7.4	Reduced Order Filtering	120
7.5	Reduced Order Smoothing	125
	7.5.1 Fixed Interval Smoothing (T fixed)	126
	7.5.2 Fixed Interval Smoothing (T fixed)	133
	7.5.3 Fixed lag Smoothing	134
7.6	Summary	134
8	Linear Two-Point Boundary Value Processes	137
8.1	Introduction	137
8.2	Problem Statement	138
8.3	Least-Squares Approach to Smoothing	140
8.4	Reduced Order Smoother	145
8.5	Two-Filter Form	148
8.6	Smoothing Error	150
8.7	Special Cases	153
	8.7.1 Full Order TPBVP Smoother	153
	8.7.2 Reduced Order Separable Systems	154
8.8	Summary	155

9	Reduced Order Filtering for Flexible Space Structures	157
9.1	Introduction	157
9.2	The Mathematical Model	158
9.3	The Reduced Order Filtering Problem	160
9.4	The Solution	161
9.5	Velocity Estimation	163
9.6	Biased Reduced Order Filters	165
9.7	Comments	168
10	Robust Reduced Order Filtering	171
10.1	Introduction	171
10.2	Full Order Filtering in an H Infinity Setting	171
10.3	Reduced Order Filtering in an H Infinity Setting	176
10.4	Full Order Discrete Filtering	180
10.5	Reduced Order Discrete Filtering in an H Infinity Setting .	184
10.6	Reduced order Filters for State Dependent Noise	187
10.7	Summary	190
	Appendix A	193
	Appendix B	195
	Index	199
