Preface	xxxi	
Acknowledgments	xxxvii	
About the Author	xxxix	
<hr/>		
Chapter 1	An Introduction to the Lotus Domino Tool Suite	1
Chapter Overview		1
Product Overview		1
Lotus Notes Client		2
Domino Designer		3
Domino Administrator		4
Domino Server		6
Links to developerWorks		8
<hr/>		
Chapter 2	Getting Started with Designer	9
Chapter Overview		9
Installing the Designer Client		9
Supported Microsoft Windows Platforms		10
Memory Requirements		10
Disk Space Requirements		10

Launching the Designer Client	14
Using the Designer Client for the First Time	17
Creating My First Notes Database	17
Links to developerWorks	19
<hr/>	
Chapter 3	21
Navigating the Domino Designer Workspace	21
Chapter Overview	21
An Introduction to Designer	21
The Design Pane	23
The Work Pane	24
The Object Pane	25
The Programmer's Pane	27
The Action Pane	27
Design Tabs	29
Language Selector	30
Client and Browser Selector	30
Status Bar	30
Properties Dialog	31
Links to developerWorks	32
<hr/>	
Chapter 4	33
Domino Design Elements	33
Chapter Overview	33
Building Blocks of a Notes Database	34
Naming Design Elements	36
Working with Forms	38
Creating a Form	42
Copying a Form	42
Hidden Forms	42
Working with Fields	44
Working with Keyword Fields	46
Authors Field	48
Checkbox Field	48
Color Field	48
Combobox Field	49
Date/Time Field	50
Dialog List Field	51
Formula Field	52
Listbox Field	52

Names Field	53
Number Field	54
Password Field	54
Radio Button Field	54
Readers Field	55
Rich Text Field	56
Rich Text Lite Field	56
Text Field	56
Time Zone Field	56
Setting the Field Mode (Editable versus Computed)	57
Hiding Objects	58
Field Processing Order	60
Setting the Form Type	61
Working with Layout Regions	62
Creating a Layout Region	63
Working with Sections	64
Creating a Standard Section	65
Editing a Section	65
Controlled Sections	67
Creating a Controlled Section	67
Working with Buttons	69
Creating an Action Bar Button	70
Creating a Hotspot Button	70
Creating an Action Hotspot	70
Commonly Implemented Buttons	71
Working with Views	72
Hidden Views	74
Creating a Standard Outline View	75
Creating a Calendar View	77
Working with Application Menus	78
Working with Folders	79
Creating a Folder	79
Working with Framesets	79
Working with Pages	81
Creating a Page	81
Working with Shared Code	82
Agents	82
Web Services	82
Outlines	82
Subforms	82
Fields	83

Columns	83
Actions	83
Script Libraries	83
Working with Shared Resources	84
Images	84
Files	84
Applets	85
Style Sheets	85
Data Connections	85
Working with “Other” Design Elements	85
Icon	86
Using This Database	86
About This Database	87
Database Script	88
Navigators	89
Synopsis	89
Working with Events	90
Links to developerWorks	91

Chapter 5 An Introduction to Formula Language 93

Chapter Overview	93
What Is Formula Language?	93
What Is a Formula?	94
Working with Variables	94
Formula Language Keywords	96
Working with Operators	97
General Syntax Rules	98
What Are Functions and Commands?	99
What Are Commands?	101
Working with Text Strings	103
Working with Conditional Branching	104
Working with Iterative Loops	104
Working with Lookup Functions	105
Working with Dates	107
Working with Lists	108
Working with User Prompts	110
Debugging Formula Language	112
Links to developerWorks	113

Chapter 6	An Introduction to LotusScript	115
Chapter Overview		115
Introduction to Object-Oriented Programming		115
LotusScript Classes		117
Keywords		117
Variables		117
Constants		118
Operators		119
Comments		120
Defining Variables and Constants		120
Defining Object Reference Variables		122
Working with Conditional Branching		123
Working with Iterative Loops		125
Communicating with Users		126
Messagebox Statement		127
Print Statement		130
Inputbox Statement		131
Dialogbox Statement		132
Working with Arrays		133
Using Formula Language in LotusScript Code		134
Compiling LotusScript Code		135
Links to developerWorks		135
Chapter 7	Fundamentals of a Notes Application	137
Chapter Overview		137
The Five Primary Application Types		138
The Application Development Life Cycle		139
Elements of a Project Plan		141
Elements of a Project Schedule		143
Questions to Ask When Designing a Database		145
Designing a Notes Application		147
Project: Build a Database to Track Web Sites		147
Step 1: Create the Database		148
Step 2: Create the Form and Fields		149
Step 3: Create the View		151
Step 4: Create the Script Library		155
Step 5: Add Buttons to the Form		158
Step 6: Add Buttons to the View		161

Step 7: Add Navigation	162
Step 8: Create Welcome and Help Documents	164
Step 9: Customize the Database Icon	165
Step 10: Set the Database Security	166
Links to developerWorks	167

Chapter 8	Calendar Applications	169
Chapter Overview		169
Application Architecture		170
Managing Recurring Events Using Single Documents		171
Single Document Recurring Event		172
Managing Recurring Events Using Multiple Documents		172
Project A: Build an Event Calendar		174
Create the Database		174
Create the Appointment Form		175
Define the Fields		176
Set the Form Objects and Properties		177
QuerySave Event		178
Form Property		179
Create the Calendar View		180
Define the Columns		180
Set the View Objects and Properties		182
Create Action Buttons for the View		183
Project B: Build a Conference Room Reservation System		185
Create the Database		185
Create the Appointment Form		186
Window Title		190
Create the Repeat Entry Form		191
Create the Repeat Calendar Event Script Library		198
Declarations		199
Initialize		199
Repeat Daily		200
Repeat Weekly		201
Repeat Monthly by Day		201
Repeat Monthly by Date		202
Repeat Custom Dates		204
Process Repeating Calendar Event		204
Display Repeat Dialog Window		204
Create Repeating Calendar Entries		205

Create the CheckFields Subroutine	206
Set the Appointment Form Objects and Properties	207
QuerySave	207
QueryClose	208
Create Action Buttons for the Appointment Form	209
Create the Calendar View	210
Define the Columns	211
Set View Objects and Properties	212
RegionDoubleClick Event	213
QueryPaste Event	213
Create Action Button for the View	213
Security	214
Links to developerWorks	216

Chapter 9 Collaborative Applications 217

Chapter Overview	217
Collaborative Applications	218
Project A: Build a Discussion Forum	218
Application Architecture	218
Create the Database	221
Set the Database Roles	221
Create the Discussion Forum Script Library	222
Create the Shared Action Buttons	227
Create the Forum Fields Subform	230
Create the New Topic Form	231
Create the Response Form	234
Create the Response to Response Form	235
Create the Category Form	235
Create the Subscription Form	237
Define Who Can Update the Forum Subscription	238
Create the By Topic View	239
Create the By Category View	241
Create the By Author View	242
Create the Subscriptions Administration View	245
Create the Categories Administration View	247
Create the Email Queue Administration View	247
Create an Email Scheduled Agent	249
Agent LotusScript Routine	250
Security	251

Project B: Build a Project Control Notebook	252
Application Architecture	252
Create the Database	253
Create the Shared Action Buttons	253
Create the Shared Fields	254
Create the Meeting Form	255
Create the Project Document Form	257
Create the Action Item Form	259
Create the Team Member Form	262
Create the Meeting View	263
Create the Documents By Category View	265
Create the Documents By Date View	266
Create the Action Items By Date View	267
Create the Action Items By Person View	268
Create the Late Action Items View	268
Create the Team Member View	268
Security	270
Links to developerWorks	271
<hr/>	
Chapter 10	Reference Library Applications
	273
Chapter Overview	273
Reference Library Applications	274
Project A: Build a Connection	274
Architecture	274
Create the Database	275
Set the Database Roles	276
Create the Connection Form	277
QuerySave Event	278
Edit Button	279
Save Button	279
Close Button	279
Query Server Button	280
Create the Memo Form	282
Create the Send Button	284
Create the Cancel Button	284
Create the Import Connection Button	284
Update Form Properties	286
Create the Servers View	287
Create the New Connection Button	288

Create the Send Connection Button	288	
Create the Refresh Connections Button	289	
Application Security	291	
Project B: Build a Spreadsheet Generator	292	
Architecture	292	
Create the Database	293	
Create the Spreadsheet Script Library	294	
Declarations	295	
Initialize Subroutine	295	
PromptUser Subroutine	295	
GenerateReport Subroutine	296	
CreateSpreadsheet Subroutine	297	
RemoveString Function	299	
SendReport Subroutine	300	
Create the Generate Report Shared Action	300	
Create the Contact Form	301	
Create the Contact View	301	
<hr/>		
Chapter 11	Workflow Applications	303
Chapter Overview		303
Defining a Workflow Application		304
Project: Building a Workflow Database		306
Architecture		306
Forms		306
Roles and Responsibilities		307
Email Notifications		307
Views		308
Configuration		309
Create the Database		310
Set the Database Roles		310
Create the Workflow Script Library		311
Declarations		312
Initialize Subroutine		312
ChangeStatus Subroutine		312
CheckFieldValues Function		313
CheckMsgFieldValues Function		314
CheckEditMode Subroutine		314
SendNotice Subroutine		315

ReplaceElement	316
Create the Request Form	317
Create the Labels	317
Create the Fields	319
Create the Controlled Section	320
Options	322
Window Title	323
Set the QuerySave Event	323
Create the Close Button	324
Create the Submit Button	324
Create the Approved Button	324
Create the Denied Button	325
Create the In Process Button	326
Create the Complete Button	326
Create the Withdraw Button	327
Create the Message Form	329
Create the Controlled Section	330
Options	332
Set the QuerySave Event	333
Create the System Profile Form	334
Created the Controlled Section	336
Create the By Number View	337
Set the View Selection Criteria	338
Set the QueryPaste Event	338
Create the By Status View	339
Create the By Author View	339
Create the Work Queues\Approvers View	339
Create the Work Queues\Procurement View	340
Create the Admin\Messages View	340
Set the QueryPaste Event	342
Create the Admin\System Profile View	342
Set the QueryPaste Event	342
Create the Request Number View	343
Application Security	343
Configure the Workflow Application	344
Set the Workflow Messages	344
Create the System Profile	346
Optional Configuration	347
Links to developerWorks	347

Chapter 12	Web Applications	349
Chapter Overview		349
Defining a Web Application		350
Project: Building a Domino Web Site		352
Create the Database		353
Create the Website LotusScript Library		353
Declarations		354
Initialize		354
Create the SaveWebOutput Subroutine		354
Create the AssignTrackingNumber Subroutine		354
Create the wSaveDocAgent Agent		355
(Options)		356
Initialize		356
Create the Shared Fields		358
Create the wMenuTop Subform		359
Create the Hidden Fields		359
Build the Web Page		360
Create the wMenuBottom Subform		363
Create the wNextPrevTop Subform		363
Create the Previous Hotspot		364
Create the Next Hotspot		364
Create the Expand All Hotspot		364
Create the Collapse All Hotspot		365
Create the Help Hotspot		365
Create the wNextPrevBottom Subform		365
Create the \$\$NavigatorTemplate for MainNav Form		366
Insert the Top HTML Subform		366
Add the Welcome Text		367
Insert the Bottom HTML Subform		367
HTML Body Attributes		367
Set Form Properties		367
Create the \$\$ViewTemplateDefault Form		368
Insert the Top Hotspots Subform		368
Create the \$\$ViewBody Field		369
Insert the BottomHotspots Subform		369
Insert the Bottom Menu Subform		369
Create the AssetForm		369
Create Web Page Buttons		370
Create the Edit Button		370

Create the Save Button	371
Create the Home Button	371
Create the HelpButton	371
Set the “Global (Options)” Parameters	373
Update the HTML Head Content Object	373
Update the WebQuerySave Event	373
Update the QuerySave Event	373
Create View 1	375
Set the View Selection Criteria	375
Create View 2	375
Create the RecordNo View	376
Import Graphics	376
Create the MainNav Navigator	377
Create the Notes Client Navigation	377
Create the Outline	377
Create the Page	379
Create the Frameset	381
Set the Database Default	383
Update the “Using This Database” Document	383
Security	384
Anonymous Access	384
Domino Authentication	384
Windows NT Authentication	384
Troubleshooting	385
Links to developerWorks	387

Chapter 13 Design Enhancements Using LotusScript 389

Chapter Overview	389
Custom LotusScript Functions and Routines	390
Compare Two Dates	392
Check for an Element in an Array	394
Replace an Element in an Array	395
Remove a Character from a String	397
Remove an Element from an Array	398
Compare Two Arrays	399
Working with Dynamic Arrays	401
Create a Custom Popup Dialog Box	403
Refresh a Document from the User Interface	405
Search for a Document	406

Working with Dates and Times	409
Compute the Day of the Week	411
How to Reference "\$" Fields	412
How to Set the "ReturnReceipt" for LotusScript-Generated Email	414
Add Field Validation to a Form	415
Display an "Are You Sure?" Message	417
Format a User's Name	418
Automatically Update a "History" Field When a Document Changes	420
Prompt the User to Describe Document Changes and Update the "History" Log	421
Create a Unique Document Record Number	423
Option A—Numeric Only	426
Option B—Alphanumeric	427
Limit the Ability to Create Documents on a Local Database	428
How to Zero Pad a Text Number	429
How to Add Text to a Rich Text Object	431
How to Attach a File to a Rich Text Object	431
How to Format Text in a Rich Text Object	433
Change Document to Edit Mode	435
Obtain the Current Roles Assigned to a User	436
Generate a Document in Another Database	438
Generate a New Document by Duplicating an Existing Document	441
Prompt in LotusScript	442
Sending Email to Multiple Recipients Using LotusScript	445
Add a View Icon and Mood Stamp to an Email	447
Retrieve and Update NOTES.INI Environment Values	449
Assign One Rich Text Object to Another Rich Text Object	450
Add a Document, View, or Database Link to a Rich Text Field	452
Create a Button to Add a Calendar Event	455
Links to developerWorks	458
Chapter 14 Design Enhancements Using Formula Language	459
Chapter Overview	459
Formula Language Enhancements	460
Compare Two Lists	460
Expand and Collapse All Document Sections	462
Expand and Collapse All View Categories	462
Get the Current Day of the Week	464
Get the Current Month of the Year	465
Create a Formatted Date String	466

Chapter 17	Miscellaneous Enhancements and Tips for Domino Databases	517
Chapter Overview		517
Miscellaneous Enhancements		517
Disable the Ability to Print, Copy, Cut, and Forward Documents		518
Using Field Hints on a Form		520
Using Static Popups to Display Help Messages		521
How to Inherit Fields Between Forms		523
Add an Icon to an Action Button		525
Create a Custom Application Interface		526
How to Set the Field Tab Order on a Form		536
Domino Shortcut Keys		537
Function Key Shortcuts for the Lotus Notes Client		537
General Usage Shortcut Keys		538
Shortcut Keys for Editing a Document		539
Workspace Shortcut Keys for the Lotus Notes Client		541
Chapter 18	Data Management	543
Chapter Overview		543
Importing Data		543
Exporting Data		548
Migrating Data		551
Creating Tables		553
Modifying Data Using a LotusScript Agent		555
Archiving Data Using an Agent		556
Refreshing All Documents		560
Chapter 19	Security	561
Chapter Overview		561
Access Control List Fundamentals		561
Person, Group, and Server		562
User Type		564
Access Levels		564
Access Role		565
Managing Database Access		566
Setting the Default Access		567
Adding Users to the ACL		568

Create the Install Database Button	611
Create a Server Connection Document Button	613
The Importance of Database Backups	614
Process Synopsis	615
Links to developerWorks	616
Chapter 21 Troubleshooting	617
Chapter Overview	617
Troubleshooting LotusScript	617
Managing Compile-Time Errors	618
Managing Run-time Errors	621
Managing Logic Errors	626
Troubleshooting Agents	627
Working with the Agent Log	628
Working with the Debugger	629
Working with Message Prompts	629
Working with the Domino Server Log	629
Working with the Domino Server Console	630
Common Database Problems	631
Variant Does Not Contain an Object	631
Illegal Circular Use	632
Unable to Find Path to Server	632
Document or Database Link Does Not Work	633
Database Design Does Not Update	634
Where to Find Additional Assistance	635
Using the Database Synopsis	635
Discussion Forums and Web Sites	637
Links to developerWorks	640
Appendix A Online Project Files and Sample Applications	641
About the Online Materials	641
About the Companion Web Site	642
Become a Member of the Companion Web Site	642
Register the Book and Download the Developer's Toolbox	642
About the Developer's Toolbox	643
About the "Chapter 07 Fundamentals Project" Folder	644
About the "Chapter 08 Calendar Project" Folder	645

About the “Chapter 09 Collaboration Project” Folder	647
About the “Chapter 10 Reference Library Project” Folder	648
About the “Chapter 11 Workflow Project” Folder	650
About the “Chapter 12 Web Site Project” Folder	651
About the “Chapter 18 Data Management” Folder	652
About the “Development Tools and Files” Folder	653
Installing a Notes Database	654

Appendix B IBM Lotus Notes and Domino—What’s Next? 657

Developer-Specific Enhancements	659
What Is a Composite Application?	659
Benefits for Lotus Notes and Domino Customers	660
Benefits for Lotus Notes and Domino Programmers	661
Composite Application Development Tools	661
IBM Lotus Domino Designer	662
IBM Workplace Designer	662
IBM Application Editor Tool	663
Composite Application Editor	665
Adding Value into the Future	669
Endnotes	669

Index 671
