Foreword	VIII
Participants	IX
Preface	XI

Optimality Conditions and Algorithms

Tent Method in Optimal Control Theory <i>V.G. Boltyanski</i>	3
Pontryagin's Maximum Principle for Multidimensional Control Problems <i>R. Klötzler, S. Pickenhain</i>	21
An Algorithm for Abstract Optimal Control Problems Using Maximum Principles and Applications to a Class of Distributed Parameter Systems <i>H. Benker, M. Handschug</i>	31
Convexification of Control Problems in Evolution Equations <i>W. Kampowsky, U. Raitums</i>	43
Semidiscrete Ritz–Galerkin Approximation of Nonlinear Parabolic Boundary Control Problems <i>F. Tröltzsch</i>	57
Iterative Methods for Optimal Control Processes governed by Integral Equations <i>W.H. Schmidt</i>	69
Solving Equations a Problem of Optimal Control <i>L. Bittner</i>	83
On the Minimax Optimal Control Problem and Its Variations <i>P. Lu, N.X. Vinh</i>	99

Numerical Methods

Trajectory Optimization Using Sparse Sequential Quadratic Programming <i>J.T. Betts</i>	115
--	-----

Numerical Solution of Optimal Control Problems by Direct Collocation <i>O.v. Stryk</i>	129
Reduced SQP Methods for Nonlinear Heat Conduction Control Problems <i>F.-S. Kupfer, E.W. Sachs</i>	145
Analysis and Synthesis of Nonlinear Systems	
Decomposition and Feedback Control of Nonlinear Dynamic Systems <i>F.L. Chernousko</i>	163
A Discrete Stabilizing Study Strategy for a Student Related Problem under Uncertainty <i>G. Leitmann, C.S. Lee</i>	173
Stability Conditions in Terms of Eigenvalues of a Nonlinear Optimal Controlled System <i>H. Bourdache-Siguerdidjane</i>	187
Program-Positional Optimization for Dynamic Systems <i>R. Gabasov, F.M. Kirillova, N.V. Balashevich</i>	195
Synthesis of Bilinear Controlled Systems with Delay <i>V. Kolmanovskii, N. Koroleva</i>	207
Constructing Feedback Control in Differential Games by Use of “Central” Trajectories <i>G. Sonnevend</i>	221
Applications to Mechanical and Aerospace Systems	
Singular Perturbation Time-Optimal Controller on Disk-Drives <i>M.D. Ardema, E. Cooper</i>	251
Optimal Design of Elastic Bars <i>L. Mikulski</i>	265
Combining Indirect and Direct Methods in Optimal Control: Range Max- imization of a Hang Glider <i>R. Bulirsch, E. Nerz, H.J. Pesch, O.v. Stryk</i>	273
Periodic Optimal Trajectories with Singular Control for Aircraft with High Aerodynamic Efficiency <i>G. Sachs, K. Lesch, H.G. Bock, M. Steinbach</i>	289

Optimal Flight Paths with Constrained Dynamic Pressure <i>W. Grimm</i>	305
Optimal Ascent of a Hypersonic Space Vehicle <i>K. Chudej</i>	317
Controllability Investigations of a Two-Stage-to-Orbit Vehicle <i>B. Kugelmann, H.J. Pesch</i>	327
Optimal Design of a Mission to Neptune <i>R. Callies</i>	341
