<b>▶ An Introduction to Exercise and Sport Physiology</b>	<b>xviii</b>
Focus of Exercise and Sport Physiology .....	3
Historical Events .....	3
Acute Physiological Responses to Exercise .....	13
Chronic Physiological Adaptations to Training .....	20
Research: Foundation of Understanding .....	21

## **PART I ESSENTIALS OF MOVEMENT**

<b>▶ Chapter 1 Muscles and How They Move</b>	<b>32</b>
Structure and Function of Skeletal Muscle .....	35
Skeletal Muscle and Exercise .....	44

<b>▶ Chapter 2 Neurological Control of Movement</b>	<b>58</b>
An Overview of the Nervous System .....	60
Structure and Function of the Nervous System .....	61
Central Nervous System .....	69
Peripheral Nervous System .....	71
Sensory-Motor Integration .....	73
Motor Response .....	81

<b>▶ Chapter 3 Neuromuscular Adaptations to Resistance Training</b>	<b>84</b>
Terminology .....	87
Resistance Training and Gains in Muscular Fitness .....	89
Mechanisms of Gains in Muscle Strength .....	90
Muscle Soreness .....	99
Designing Resistance Training Programs .....	104
Resistance Training for Special Populations .....	110

## **PART II ENERGY FOR MOVEMENT**

▶ <b>Chapter 4 Metabolism, Energy, and the Basic Energy Systems</b>	<b>118</b>
Energy Sources .....	120
Bioenergetics: The Basic Energy Systems .....	122
Measuring Energy Use During Exercise .....	133
Energy Expenditure at Rest and During Exercise .....	139
Fatigue and Its Causes .....	148
▶ <b>Chapter 5 Hormonal Regulation of Exercise</b>	<b>158</b>
Nature of Hormones .....	161
Endocrine Glands and Their Hormones .....	164
Hormonal Response to Exercise .....	173
Hormonal Effects on Metabolism and Energy .....	173
Hormonal Effects on Fluid and Electrolyte Balance During Exercise .....	178
▶ <b>Chapter 6 Metabolic Adaptations to Training</b>	<b>184</b>
Adaptations to Aerobic Training .....	186
Training the Aerobic System .....	194
Adaptations to Anaerobic Training .....	196

## **PART III CARDIOVASCULAR AND RESPIRATORY FUNCTION AND PERFORMANCE**

▶ <b>Chapter 7 Cardiovascular Control During Exercise</b>	<b>206</b>
Structure and Function of the Cardiovascular System .....	208
Cardiovascular Response to Exercise .....	223
▶ <b>Chapter 8 Respiratory Regulation During Exercise</b>	<b>242</b>
Pulmonary Ventilation .....	244
Pulmonary Diffusion .....	247
Transport of Oxygen and Carbon Dioxide .....	250
Gas Exchange at the Muscles .....	253
Regulation of Pulmonary Ventilation .....	256
Ventilation and Energy Metabolism .....	261
Respiratory Limitations to Performance .....	263
Respiratory Regulation of Acid–Base Balance .....	264

<b>▶ Chapter 9</b>	<b>Cardiovascular and Respiratory Adaptations to Training</b>	<b>270</b>
	Endurance: Muscular and Cardiorespiratory .....	273
	Evaluating Cardiorespiratory Endurance Capacity .....	273
	Cardiovascular Adaptations to Training .....	274
	Respiratory Adaptations to Training .....	287
	Metabolic Adaptations to Training .....	288
	Long-Term Improvement in Cardiorespiratory Endurance .....	291
	Factors Affecting the Response to Aerobic Training .....	291
	Cardiorespiratory Endurance and Performance .....	298

<b>PART IV ENVIRONMENTAL INFLUENCES ON PERFORMANCE</b>
--

<b>▶ Chapter 10</b>	<b>Exercise in Hot and Cold Environments: Thermoregulation</b>	<b>306</b>
	Mechanisms of Body Temperature Regulation .....	308
	Physiological Responses to Exercise in the Heat .....	315
	Health Risks During Exercise in the Heat .....	319
	Acclimatization to Exercise in the Heat .....	324
	Exercise in the Cold .....	326
	Physiological Responses to Exercise in the Cold .....	329
	Health Risks During Exercise in the Cold .....	331
	Acclimatization to Exercise in the Cold .....	332

<b>▶ Chapter 11</b>	<b>Exercise in Hypobaric, Hyperbaric, and Microgravity Environments</b>	<b>336</b>
	Hypobaric Environments: Exercising at Altitude .....	338
	Hyperbaric Environments: Exercising Underwater .....	352
	Microgravity Environments: Exercising in Space .....	360

<b>PART V OPTIMIZING PERFORMANCE IN SPORT</b>
---

<b>▶ Chapter 12</b>	<b>Training for Sport</b>	<b>374</b>
	Optimizing Training—A Model .....	377
	Excessive Training .....	378
	Overreaching .....	381
	Overtraining .....	381

Tapering for Peak Performance .....	390
Detraining .....	392
Retraining .....	399
<b>▶ Chapter 13 Nutrition and Sport</b>	<b>404</b>
Six Nutrient Classes .....	406
Water and Electrolyte Balance .....	425
The Athlete's Diet .....	432
Designing Sport Drinks .....	438
<b>▶ Chapter 14 Body Weight, Body Composition, and Sport</b>	<b>446</b>
Body Build, Body Size, and Body Composition .....	448
Assessing Body Composition .....	450
Body Composition and Sport Performance .....	456
Weight Standards .....	458
Achieving Optimal Weight .....	464
<b>▶ Chapter 15 Ergogenic Aids and Sport</b>	<b>470</b>
Researching Ergogenic Aids .....	474
Pharmacological Agents .....	476
Hormonal Agents .....	486
Physiological Agents .....	494
Nutritional Agents .....	502

## **PART VI AGE AND SEX CONSIDERATIONS IN SPORT AND EXERCISE**

<b>▶ Chapter 16 Children and Adolescents in Sport and Exercise</b>	<b>512</b>
Body Composition: Growth and Development of Tissues .....	514
Physiological Responses to Acute Exercise .....	518
Physiological Adaptations to Exercise Training .....	526
Motor Ability and Sport Performance .....	530
Special Issues .....	533
<b>▶ Chapter 17 Aging in Sport and Exercise</b>	<b>538</b>
Body Size and Composition .....	540
Physiological Responses to Acute Exercise .....	542
Physiological Adaptations to Exercise Training .....	554
Sport Performance .....	556
Special Issues .....	559

<b>▶ Chapter 18 Sex Differences in Sport and Exercise</b>	<b>566</b>
Body Size and Composition .....	569
Physiological Responses to Acute Exercise .....	573
Physiological Adaptations to Exercise Training .....	579
Sport Performance .....	582
Special Issues .....	582

<b>PART VII PHYSICAL ACTIVITY FOR HEALTH AND FITNESS</b>
--

<b>▶ Chapter 19 Prescription of Exercise for Health and Fitness</b>	<b>604</b>
Medical Clearance .....	608
Exercise Prescription .....	614
Monitoring Exercise Intensity .....	618
Exercise Program .....	624
Exercise and Rehabilitation of People With Diseases .....	630

<b>▶ Chapter 20 Cardiovascular Disease and Physical Activity</b>	<b>634</b>
Forms of Cardiovascular Disease .....	637
Understanding the Disease Process .....	642
Determining Individual Risk .....	644
Reducing Risk Through Physical Activity .....	650
Risk of Heart Attack and Death During Exercise .....	658

<b>▶ Chapter 21 Obesity, Diabetes, and Physical Activity</b>	<b>664</b>
Obesity .....	666
Diabetes .....	688
