

Table of Contents

Preface	v
Chapter I Universal Algebra	1
§1 Introduction	1
§2 Free Algebras	4
§3 Varieties of Algebras	7
§4 Relatively Free Algebras	8
Chapter II Propositional Calculus	11
§1 Introduction	11
§2 Algebras of Propositions	11
§3 Truth in the Propositional Calculus	13
§4 Proof in the Propositional Calculus	14
Chapter III Properties of the Propositional Calculus	18
§1 Introduction	18
§2 Soundness and Adequacy of $\text{Prop}(X)$	19
§3 Truth Functions and Decidability for $\text{Prop}(X)$	22
Chapter IV Predicate Calculus	26
§1 Algebras of Predicates	26
§2 Interpretations	29
§3 Proof in $\text{Pred}(V, \mathcal{R})$	30
§4 Properties of $\text{Pred}(V, \mathcal{R})$	32
Chapter V First-Order Mathematics	38
§1 Predicate Calculus with Identity	38
§2 First-Order Mathematical Theories	39
§3 Properties of First-Order Theories	43
§4 Reduction of Quantifiers	48
Chapter VI Zermelo-Fraenkel Set Theory	52
§1 Introduction	52
§2 The Axioms of ZF	52
§3 First-Order ZF	56
§4 The Peano Axioms	58

Chapter VII	Ultraproducts	62
§1	Ultraproducts	62
§2	Non-Principal Ultrafilters	64
§3	The Existence of an Algebraic Closure	66
§4	Non-Trivial Ultrapowers	67
§5	Ultrapowers of Number Systems	68
§6	Direct Limits	70
Chapter VIII	Non-Standard Models	74
§1	Elementary Standard Systems	74
§2	Reduction of the Order	75
§3	Enlargements	76
§4	Standard Relations	78
§5	Internal Relations	79
§6	Non-Standard Analysis	80
Chapter IX	Turing Machines and Gödel Numbers	85
§1	Decision Processes	85
§2	Turing Machines	85
§3	Recursive Functions	89
§4	Gödel Numbers	90
§5	Insoluble Problems in Mathematics	93
§6	Insoluble Problems in Arithmetic	96
§7	Undecidability of the Predicate Calculus	101
Chapter X	Hilbert's Tenth Problem, Word Problems	105
§1	Hilbert's Tenth Problem	105
§2	Word Problems	110
	References and Further Reading	115
	Index of Notations	117
	Subject Index	119
