Preface *page* **xiii**

Mathematical prolegomenon **xvii**

0.1 Set-theoretic notation xvii
0.2 Proof by induction xix

1 Classical logic and the material conditional **1**

1.1 Introduction 1
1.2 The syntax of the object language 2
1.3 Semantic validity 3
1.4 Tableaux 4
1.5 Counter-models 8
1.6 Conditionals 9
1.7 The material conditional 10
1.8 Subjunctive and counterfactual conditionals 11
1.9 More counter-examples 13
1.10 Arguments for ⊃ 14
1.11 *Proofs of theorems 15
1.12 History 17
1.13 Further reading 17
1.14 Problems 18

2 Basic modal logic **20**

2.1 Introduction 20
2.2 Necessity and possibility 20
2.3 Modal semantics 21
2.4 Modal tableaux 24
2.5 Possible worlds: representation 28

2.6 Modal realism 29
2.7 Modal actualism 30
2.8 Meinongianism 31
2.9 *Proofs of theorems 33
2.10 History 35
2.11 Further reading 36
2.12 Problems 36

3 Normal modal logics 38

3.1 Introduction 38
3.2 Semantics for normal modal logics 38
3.3 Tableaux for normal modal logics 40
3.4 Infinite tableaux 44
3.5 *S5* 47
3.6 Which system represents necessity? 48
3.7 *Proofs of theorems 52
3.8 History 54
3.9 Further reading 54
3.10 Problems 55

4 Non-normal worlds; strict conditionals 58

4.1 Introduction 58
4.2 Non-normal worlds 58
4.3 Tableaux for non-normal modal logics 60
4.4 The properties of non-normal logics 62
4.5 Strict conditionals 63
4.6 The paradoxes of strict implication 64
4.7 ... and their problems 65
4.8 The explosion of contradictions 67
4.9 Lewis' argument for explosion 68
4.10 *Proofs of theorems 69
4.11 History 71
4.12 Further reading 72
4.13 Problems 72

5 Conditional logics **74**

5.1 Introduction 74
5.2 Some more problematic inferences 74
5.3 Conditional semantics 77
5.4 Tableaux for C 78
5.5 Extensions of C 80
5.6 Similarity spheres 83
5.7 C_1 and C_2 88
5.8 Further philosophical reflections 91
5.9 *Proofs of theorems 93
5.10 History 95
5.11 Further reading 96
5.12 Problems 96

6 Intuitionist logic **99**

6.1 Introduction 99
6.2 Intuitionism: the rationale 99
6.3 Possible-world semantics for intuitionism 101
6.4 Tableaux for intuitionist logic 104
6.5 The foundations of intuitionism 108
6.6 The intuitionist conditional 110
6.7 *Proofs of theorems 111
6.8 History 114
6.9 Further reading 114
6.10 Problems 115

7 Many-valued logics **117**

7.1 Introduction 117
7.2 Many-valued logic: the general structure 117
7.3 The 3-valued logics of Kleene and Łukasiewicz 119
7.4 LP and RM_3 122
7.5 Many-valued logics and conditionals 123
7.6 Truth-value gluts: inconsistent laws 125
7.7 Truth-value gluts: paradoxes of self-reference 127
7.8 Truth-value gaps: denotation failure 128
7.9 Truth-value gaps: future contingents 130

7.10 Supervaluations, modality and many-valued logic 131
7.11 *Proofs of theorems 134
7.12 History 136
7.13 Further reading 137
7.14 Problems 137

8 First degree entailment 139

8.1 Introduction 139
8.2 The semantics of *FDE* 139
8.3 Tableaux for *FDE* 141
8.4 *FDE* and many-valued logics 144
8.5 The Routley star 147
8.6 Paraconsistency and the disjunctive syllogism 151
8.7 *Proofs of theorems 152
8.8 History 159
8.9 Further reading 159
8.10 Problems 160

9 Basic relevant logic 162

9.1 Introduction 162
9.2 Adding $\rightarrow$ 162
9.3 Tableaux for K_4 163
9.4 Non-normal worlds again 165
9.5 Tableaux for N_4 167
9.6 Star again 168
9.7 Impossible worlds and relevant logic 171
9.8 *Proofs of theorems 174
9.9 History 179
9.10 Further reading 179
9.11 Problems 179

10 Mainstream relevant logics 182

10.1 Introduction 182
10.2 The logic *B* 182
10.3 Tableaux for *B* 184
10.4 Extensions of *B* 188

10.5 The system R 193
10.6 The ternary relation 197
10.7 *Ceteris paribus* enthymemes 198
10.8 *Proofs of theorems 202
10.9 History 205
10.10 Further reading 206
10.11 Problems 207

11 Fuzzy logic **211**

11.1 Introduction 211
11.2 Sorites paradoxes 211
11.3 ... and responses to them 212
11.4 The continuum-valued logic Ł 214
11.5 Axioms for $Ł_{\aleph}$ 218
11.6 Conditionals in Ł 221
11.7 Fuzzy relevant logic 222
11.8 History 225
11.9 Further reading 226
11.10 Problems 226

12 Conclusion: an historical perspective **229**
