PART ONE LANGUAGE

<i>Chapter 1</i>	Introduction	3
1.1	What Is Logic?	3
1.2	Premises and Conclusions	5
1.3	Recognizing Arguments	17
1.4	Deduction and Induction	23
1.5	Truth and Validity	32
<i>Chapter 2</i>	The Uses of Language	44
2.1	Three Basic Functions of Language	44
2.2	Discourse Serving Multiple Functions	47
2.3	The Forms of Discourse	50
2.4	Emotive Words	59
2.5	Kinds of Agreement and Disagreement	62
2.6	Emotively Neutral Language	68
<i>Chapter 3</i>	Informal Fallacies	72
3.1	Classification of Fallacies	72

3.2	Fallacies of Relevance	73	
3.3	Fallacies of Ambiguity	92	
3.4	The Avoidance of Fallacies	101	
<i>Chapter 4</i> Definition			108
4.1	Five Purposes of Definition	108	
4.2	Verbal Disputes and Definition	112	
4.3	Five Types of Definition	117	
4.4	Various Kinds of Meaning	124	
4.5	Techniques for Defining	129	
4.6	Rules for Definition by Genus and Difference	136	
<i>PART TWO</i> DEDUCTION			
<i>Chapter 5</i> Categorical Propositions			147
5.1	Categorical Propositions and Classes	147	
5.2	Quality, Quantity, and Distribution	151	
5.3	The Traditional Square of Opposition	155	
5.4	Further Immediate Inferences	159	
5.5	Existential Import	169	
5.6	Symbolism and Diagrams for Categorical Propositions	173	
<i>Chapter 6</i> Categorical Syllogisms			181
6.1	Standard-Form Categorical Syllogisms	181	
6.2	The Formal Nature of Syllogistic Argument	185	
6.3	Venn Diagram Technique for Testing Syllogisms	188	
6.4	Rules and Fallacies	198	
<i>Chapter 7</i> Arguments in Ordinary Language			207
7.1	Reducing the Number of Terms in a Syllogistic Argument	207	
7.2	Translating Categorical Propositions into Standard Form	211	
7.3	Uniform Translation	217	
7.4	Enthymemes	224	
7.5	Sorites	228	
7.6	Disjunctive and Hypothetical Syllogisms	231	
7.7	The Dilemma	237	

<i>Chapter 8</i>	Symbolic Logic	245
8.1	The Value of Special Symbols	245
8.2	The Symbols for Conjunction, Negation, and Disjunction	246
8.3	Conditional Statements and Material Implication	258
8.4	Argument Forms and Arguments	267
8.5	Statement Forms and Statements	278
8.6	The Paradoxes of Material Implication	283
8.7	The Three “Laws of Thought”	284
 <i>Chapter 9</i>	 The Method of Deduction	 287
9.1	Formal Proof of Validity	287
9.2	The Rule of Replacement	296
9.3	Proof of Invalidity	306
9.4	Inconsistency	309
 <i>Chapter 10</i>	 Quantification Theory	 316
10.1	Singular Propositions	316
10.2	Quantification	319
10.3	Traditional Subject–Predicate Propositions	322
10.4	Proving Validity	328
10.5	Proving Invalidity	336
10.6	Asyllogistic Inference	341
<i>PART THREE</i> INDUCTION		
 <i>Chapter 11</i>	 Analogy and Probable Inference	 351
11.1	Argument by Analogy	351
11.2	Appraising Analogical Arguments	358
 <i>Chapter 12</i>	 Causal Connections: Mill’s Methods of Experimental Inquiry	 369
12.1	The Meaning of “Cause”	369
12.2	Mill’s Methods	376
12.3	Criticisms of Mill’s Methods	399
12.4	Vindication of Mill’s Methods	406
 <i>Chapter 13</i>	 Science and Hypothesis	 422
13.1	The Values of Science	422
13.2	Explanations: Scientific and Unscientific	425

13.3	Evaluating Scientific Explanations	430
13.4	The Detective as Scientist	435
13.5	Scientists in Action: The Pattern of Scientific Investigation	444
13.6	Crucial Experiments and Ad Hoc Hypotheses	449
13.7	Classification as Hypothesis	455
<i>Chapter 14</i> Probability		469
14.1	Alternative Conceptions of Probability	469
14.2	The Probability Calculus	473
14.3	Expectation or Expected Value	484
Solutions to Selected Exercises		489
Special Symbols		527
