

# CONTENTS

CHAPTER 1. INTRODUCTION . . . . .	1
1-1 Our program of study . . . . .	1
1-2 How numbers developed . . . . .	1
1-3 The mathematician's view of the development of numbers . . . . .	4
1-4 A word to the reader . . . . .	4
1-5 Numbers and numerals . . . . .	5
CHAPTER 2. THE NATURAL NUMBERS . . . . .	6
2-1 Introduction . . . . .	6
2-2 Axioms . . . . .	8
2-3 Using the axioms . . . . .	19
2-4 Subtraction and division . . . . .	22
2-5 Arithmetic in other bases . . . . .	24
2-6 Structure and isomorphism . . . . .	31
CHAPTER 3. SETS, VARIABLES, AND STATEMENT FORMS . . . . .	35
3-1 Sets . . . . .	35
3-2 Subsets . . . . .	36
3-3 Variables and statement forms . . . . .	42
3-4 Unions, intersections, differences, and products . . . . .	44
CHAPTER 4. MAPPINGS AND OPERATIONS . . . . .	52
4-1 Mapping of a set into a set . . . . .	52
4-2 Mappings of a set onto a set . . . . .	54
4-3 One-to-one mappings . . . . .	56
4-4 Operations on a set . . . . .	62
4-5 Mathematical systems . . . . .	63
CHAPTER 5. GROUPS . . . . .	69
5-1 Definition of a group. Examples . . . . .	69
5-2 Inherent properties of a group . . . . .	70
5-3 Permutation groups . . . . .	73
5-4 Isomorphisms . . . . .	79
CHAPTER 6. RELATIONS AND PARTITIONS . . . . .	83
6-1 Relations on a set . . . . .	83
6-2 Properties of relations . . . . .	86
6-3 Equivalence relations . . . . .	88
6-4 Partitions . . . . .	89
6-5 Order relations . . . . .	93
CHAPTER 7. THE INTEGERS . . . . .	95
7-1 The relation $\sim$ on $N \times N$ . . . . .	95
7-2 The operations $\oplus$ and $\otimes$ on $I$ . . . . .	97

7-3	The commutativity and associativity of $\oplus$ and $\otimes$ . . . . .	98
7-4	The number system $\{I; \oplus, \otimes\}$ . . . . .	100
7-5	A new notation for the integers . . . . .	101
7-6	Subtraction and division . . . . .	110
7-7	A simplified notation for the integers . . . . .	112
7-8	Integral domains . . . . .	113
7-9	Congruences . . . . .	115
7-10	Conclusion . . . . .	122
CHAPTER 8. THE RATIONAL NUMBERS . . . . .		123
8-1	Constructing the rationals . . . . .	123
8-2	The operations $\boxplus$ and $\boxtimes$ on the rationals . . . . .	124
8-3	The commutative and associative laws . . . . .	126
8-4	Subtraction and division . . . . .	129
8-5	The cancellation laws . . . . .	131
8-6	The fractions . . . . .	132
8-7	Ordering the rationals . . . . .	135
8-8	Fields . . . . .	141
CHAPTER 9. THE REAL NUMBERS . . . . .		142
9-1	Introduction . . . . .	142
9-2	Repeating decimals . . . . .	142
9-3	Irrational numbers . . . . .	149
9-4	Sequences of rationals . . . . .	155
9-5	The real numbers . . . . .	166
9-6	The infinite decimals . . . . .	175
9-7	Countability . . . . .	184
9-8	Completeness of the reals . . . . .	190
INDEX . . . . .		193
