

# TABLE OF CONTENTS

PREFACE	IX
INTRODUCTION	XI
CHAPTER 1/WORD, FORMULA	
1.1. Word, Rank, Occurrence, Concatenation, Interval, Substitution	1
1.2. Weight; Formula, Subformula, Occurrence of a Formula, Term Dominating Another Term	2
1.3. Weight of a Word	6
1.4. Atom; Weighted Substitution	8
Exercises	13
CHAPTER 2/CONNECTIONS AND CONNECTIVE FORMULAS	
2.1. Truth Values; Connection, Arity; Negation, Conjunction, Disjunction, Implication, Deducibility	17
2.2. Connective Formula; Value, Tautology, Contradiction, Deducibility	21
2.3. Formula in $\neg, \wedge, \vee$ ; Dual; Conjunctive and Disjunctive Formulas	24
2.4. Completeness Lemma for Tautologies	27
2.5. Translation of the Completeness Lemma by Means of Weighted Substitution	31
2.6. Active, Inactive Index or Atom; Reduction, Positive Connection, Alternating Connection	33
2.7. Set Closed under Formulation	36
Exercises	42

CHAPTER 3/RELATION, MULTIRELATION;  
OPERATOR AND PREDICATE

3.1. Relation, Multirelation, Base, Arity; Concatenation; Restriction and Extension	47
3.2. Isomorphism, Automorphism, Embedding, Age	51
3.3. Deducibility of Relations	55
3.4. Operator, Predicate, Predicarity and Arity; Model; Selector, + and - Operators, Identifier, Connector, Rank-Changer, Dilator	57
3.5. Deducibility of Operators; Composite Operator; Image and Inverse Image of a Class	60
3.6. Active or Inactive Index; Quantifier; Composite Quantifier	62
3.7. Composite of Quantifier and Connector	65
3.8. Composite of Quantifier and Rank-Changer	68
Exercises	74

CHAPTER 4/LOCAL ISOMORPHISM;  
FREE OPERATOR AND FREE FORMULA

4.1. Local Isomorphism; Local Automorphism	79
4.2. Free Interpretability	81
4.3. Free Operator	84
4.4. Compactness Lemma	88
4.5. Active or Inactive Predicate; the Operators $\mathcal{P}^{\mathcal{P}}$ and $\mathcal{P}\mathcal{P}$ ; Interpolation Lemma	89
4.6. Free Formula, Arity, Predicate, Value; Thesis, Antithesis, Deduction; Image of a Free Formula under a Mapping	91
4.7. Completeness Lemma for Free Theses	96
4.8. Universal Class	98
Exercises	104

CHAPTER 5/FORMULA, OPERATOR, LOGICAL CLASS AND  
LOGICAL EQUIVALENCE; DENUMERABLE-MODEL THEOREM

5.1. Logical Formula; Arity, Predicate; Bound, Prenex and Canonical Formulas, Free and Bound Indices	110
--	-----

5.2. Logical Operator, Value, Representation by a Prenex Formula, Active and Inactive Indices	112
5.3. Thesis, Antithesis, Explicit Thesis, Deduction, Transform of a Formula under a Mapping	116
5.4. Model of a Bound Formula, Logical Class	121
5.5. Logical Class: Case of Sets and Unary Multirelations	124
5.6. Logical Equivalence; Denumerable-Model Theorem	127
5.7. Embedding Logical Class; Compactness	132
Exercises	135

#### CHAPTER 6/COMPLETENESS AND INTERPOLATION THEOREMS

6.1. Instance, Deployment, Deployed Form, Return Number, Renewal Rank	138
6.2. Every Deployed Form of a Formula P is Equideducible from P	141
6.3. Completeness Theorem	142
6.4. Lemmas on Deployment	144
6.5. Completed Deployment, Bi-Instance	145
6.6. Flexible Deployed Form	149
6.7. Interpolation Theorem	152
Exercises	155

#### CHAPTER 7/INTERPRETABILITY OF RELATIONS

7.1. Interpretability; General Considerations	158
7.2. Interpretability by Sum and Product of Natural Numbers; Arithmetical Relation	161
7.3. Interpretability of the Set of Natural Numbers by the Sum and Product of Integers, of Rationals, of Reals	165
7.4. Finitely Axiomatizable Multirelation	169
7.5. Interpretability Theorem	173
Exercises	176
