

CONTENTS

1.	PETER ACZEL and WAYNE RICHTER Inductive definitions and analogues of large cardinals ..	1
2.	PAUL D. BACSICH Compact injectives and non-standard analysis	10
3.	J. C. COLE and M. A. DICKMANN Non-axiomatizability results in infinitary languages for higher-order structures	29
4.	NIGEL CUTLAND Π_1^1 models and Π_1^1 -categoricity	42
5.	SOLOMON FEFERMAN Infinitary properties, local functors, and systems of ordinal functions	63
6.	KIT FINE Logics containing S ₄ without the finite model property ..	98
7.	MELVIN FITTING An ϵ -calculus system for first-order S ₄	103
8.	DOV M. GABBAY Craig's interpolation theorem for modal logics	111
9.	HAIM GAIFMAN A note on models and submodels of arithmetic	128
10.	ARNULF HIRSCHELMANN An application of ultra-products to prime rings with polynomial identities	145
11.	A. H. LACHLAN Embedding nondistributive lattices in the recursively enumerable degrees	149

12.	ANGUS MACINTYRE Direct powers with distinguished diagonal	178
13.	A. R. D. MATHIAS Solution of problems of Choquet and Puritz	204
14.	J. M. B. MOSS Some B. Russell's sprouts (1903-1908)	211
15.	J. B. PARIS On models of arithmetic	251
16.	MOTO-O TAKAHASHI $\tilde{\Delta}_1$ -definability in set theory	281
17.	C. E. M. YATES Initial segments and implications for the structure of degrees	305
18.	ABSTRACTS OF CONTRIBUTED PAPERS		
	Peter Aczel		
	J. L. Bell and F. Jellett		
	Roger Cusin		
	Paul Eklof and Gabriel Sabbagh		
	Paul Foulkes		
	Dov M. Gabbay		
	J. Heidema		
	P. Henrard		
	Th. Lucas		
	G. P. Monro		
	B. P. Moss		
	Gerold Stahl		
	John Tucker		
	S. S. Wainer	336
