Contents

Chapter 1 Introduction

1.1 Abstraction and Mathematics 1
1.2 Mathematics and "Reality" 2
1.3 An Example 6
1.4 Mathematical Statements. 9
1.5 Notation 13
1.6 On Rigor 15

Chapter 2 Introduction to Logic

2.1 Necessary and Sufficient Conditions 17
2.2 Negations 21
2.3 Mathematical Disproofs 23
2.4 Conjunction and Disjunction 27
2.5 Truth Tables 30
2.6 Logical Equivalence. Tautologies 35

Chapter 3 More about Logic

3.1 Converses and Contrapositives 39
3.2 On the Validity of a Proof 42
3.3 Some Elementary Arguments 45
3.4 More Elementary Arguments 50
3.5 Proofs by Contradiction 55
3.6 Summary 58

Chapter 4 Sets

4.1 The Notion of a Set 62
4.2 Set-Building Notation 66
4.3 Subsets. Equality of Sets. 68
4.4 Union and Intersection 72
4.5 The Difference of Two Sets. Complements 77

Chapter 5 Set Theory and Logic

5.1 Set Diagrams 82
5.2 Sets and Language. Venn Diagrams 87
5.3 Applying Set Theory to Arguments 93

Chapter 6 Counting

6.1 The Notion of Counting 97
6.2 More About Infinity 102
6.3 More About Countable Sets 106
6.4 The Notion of Number 111
6.5 The Addition of Cardinal Numbers 116

Chapter 7 The Cartesian Product. Functions

7.1 The Cartesian Product of Two Sets 123
7.2 The Multiplication of Cardinal Numbers 127
7.3 Functions 131
7.4 More About Functions 137
7.5 Composition of Functions. 142

Chapter 8 Relations

8.1 The Notion of a Relation 147
8.2 Equivalence Relations 152
8.3 A Definition of the Integers 157
8.4 Orderings 163

Chapter 9 More about Total Ordering

9.1 The Ordering of the Integers, an Intuitive View 171
9.2 The Ordering of the Integers, a Formal View 177
9.3 Finite Induction 180
9.4 Another Definition of the Integers 185

Chapter 10 Probability

10.1 The Nature of Probability 190
10.2 The Basic Rules of Probability 194
10.3 Methods of Assigning Probabilities 200
10.4 Sampling 206
10.5 Some Special Probabilities 213

Chapter 11 An Elementary Geometry

11.1 The Projective Plane 219
11.2 Basic Properties of the Projective Plane 223
11.3 The Affine Plane 229

Chapter 12 Conclusion

12.1 Where shall We Go From Here? 235
12.2 Mathematics as a Science 236
12.3 Mathematics as an Art 237
12.4 Conclusion 238

Appendix 239

Answers to Odd-Numbered Exercises 243

Index of Symbols 277

Index 278
