Table of Contents

1 Introduction **1**

1.1 Scope and Objectives . . . 2
1.1.1 Integration . . . 2
1.1.2 Deployment . . . 3
1.1.3 Accuracy and Credibility . . . 3
1.2 Outline . . . 3

2 Location Systems **5**

2.1 Location Information . . . 6
2.1.1 Symbolic Models . . . 6
2.1.2 Geometric Models . . . 7
2.1.3 Hybrid Models . . . 8
2.2 Position Estimation . . . 8
2.2.1 Global Positioning System . . . 10
2.2.2 Cellular Network Positioning Systems . . . 11
2.2.3 Assisted GPS . . . 13
2.3 System Architectures . . . 14
2.3.1 Location Services . . . 15
2.3.2 Location Middleware and Geoservers . . . 16
2.3.3 Relevant Standards . . . 17
2.4 Location-Aware Applications . . . 17
2.5 Summary . . . 19

3 Indoor Positioning Systems **21**

3.1 Characteristics of Indoor Environments . . . 21
3.2 A Taxonomy for Positioning Systems . . . 24
3.2.1 Fundamental System Properties . . . 24
3.2.2 General system properties . . . 28
3.2.3 Auxiliary Properties . . . 30
3.3 Dedicated Indoor Positioning Systems . . . 31
3.3.1 Active Badge . . . 31
3.3.2 Duress Alarm Location System . . . 32
3.3.3 PinPoint 3D-iD . . . 32

3.3.4 Active Bats . . . 33
3.3.5 EasyLiving . . . 33
3.3.6 Smart Floor . . . 34
3.3.7 Distributed Magnetic Local Positioning System . . . 34
3.3.8 Discussion . . . 35
3.4 Wireless Indoor Communication Networks . . . 37
3.4.1 The IEEE 802.11 Standards . . . 37
3.4.2 The HiperLAN Standards . . . 41
3.5 Approaches to Wireless LAN Positioning . . . 42
3.5.1 Proximity Detection . . . 43
3.5.2 Pattern Recognition . . . 45
3.5.3 Probabilistic Pattern Recognition . . . 47
3.5.4 Other Approaches . . . 49
3.5.5 Discussion . . . 50
3.6 Summary . . . 53

4 Indoor Radio Propagation **55**
4.1 Wireless Link Characteristics . . . 56
4.1.1 Free-space Propagation . . . 56
4.1.2 Propagation Phenomena . . . 57
4.1.3 Measurements and Observations . . . 59
4.2 Radio Propagation Models . . . 65
4.2.1 Finite-Difference Time-Domain Models . . . 65
4.2.2 Ray-Tracing Models . . . 66
4.2.3 Empirical Models . . . 66
4.3 A Probabilistic Radio Propagation Model . . . 68
4.3.1 The Multi-Wall Model . . . 68
4.3.2 Modelling Uncertainty . . . 70
4.3.3 Parametrisation and Performance Evaluation . . . 71
4.4 Summary . . . 74

5 Probabilistic Location Estimation **77**
5.1 Hidden Markov Models . . . 78
5.1.1 Discrete Markov Processes . . . 78
5.1.2 Hidden Markov Processes . . . 79
5.1.3 State Estimation of Hidden Markov Models . . . 81
5.2 Concepts of Markov Localisation . . . 83
5.2.1 Notation . . . 85
5.2.2 Independence Assumptions . . . 86
5.2.3 Update Scheme . . . 87
5.2.4 Algorithm . . . 89
5.3 Application to Wireless LAN Localisation . . . 90

5.3.1 Initialising the Probability Distribution 92
5.3.2 Sensor Model Details 94
5.3.3 Motion Detection 98
5.3.4 Movement Model Details 103
5.3.5 Interpreting the Resulting Distribution 105
5.4 Summary 109

6 The Location Service **111**
6.1 Requirements 112
6.1.1 User requirements 112
6.1.2 Operator requirements 113
6.2 Related Work 113
6.2.1 Active Badge Location Service 114
6.2.2 Xerox Ubiquitous Computing 114
6.2.3 Global Location Service 115
6.2.4 Nexus 116
6.3 Overview and Design 117
6.3.1 Design criteria 118
6.3.2 Functional decomposition 119
6.3.3 Design 121
6.3.4 Location model 123
6.3.5 Service distribution 124
6.4 System Architecture 126
6.4.1 The Name Service 126
6.4.2 The Provisioning Module 127
6.4.3 The Localiser Module 132
6.4.4 The Controller 137
6.4.5 The Distribution Module 137
6.5 Deployment and Applications 139
6.5.1 Network Infrastructure 140
6.5.2 Applications 141
6.6 Mobility Study 142
6.6.1 Terminology 143
6.6.2 Session Mobility 144
6.6.3 Station Mobility 144
6.6.4 Discussion 146
6.7 Summary 147

7 Performance Analysis **149**
7.1 A Priori Error Estimates 150
7.1.1 Deterministic Error Estimates 150
7.1.2 Probabilistic Error Estimates 151

7.1.3 Application to the Test Environment . . . 156
7.1.4 Related Work . . . 162
7.2 Experimental Setup . . . 163
7.3 Positioning Error . . . 166
7.3.1 Effect of RSS Filtering and Point Estimation . . . 166
7.3.2 Effect of Grid Spacing . . . 169
7.3.3 Effect of the Number of Visible Access Points . . . 170
7.3.4 Spatial Distribution of Errors . . . 171
7.3.5 Effect of Different Radio Maps . . . 173
7.3.6 Comparison between RML and RDL . . . 175
7.4 Station Tracking . . . 179
7.5 Dynamic Error Estimates . . . 180
7.6 Summary . . . 182

8 Conclusions **185**
8.1 Results . . . 185
8.2 Future Work . . . 187
