

CONTENTS

<i>Preface</i>	xi
PART I	
1 Introduction	3
1.1 Truth and possible worlds	4
Exercises	10
1.2 The system $S5$	14
Exercises	21
2 Logical preliminaries	25
2.1 Syntax	25
Exercises	32
2.2 Models, truth, and validity	34
Exercises	39
2.3 Filtrations	41
Exercises	43
2.4 Systems of modal logic	45
Exercises	49
2.5 Axiomatizability	51
Exercises	53
2.6 Maximality and Lindenbaum's lemma	53
Exercises	59
2.7 Soundness, completeness, and canonical models	59
Exercises	61
2.8 Decidability and the finite model property	62
Exercises	64
PART II	
3 Standard models for modal logics	67
3.1 Standard models	67
Exercises	71

3.2	The schemas D, T, B, 4, and 5	76
	Exercises	82
3.3	The schema $G^{k,l,m,n}$	85
	Exercises	90
3.4	Generated models	95
	Exercises	98
3.5	Filtrations	100
	Exercises	104
3.6	Filtrations, continued	105
	Exercises	111
4	Normal systems of modal logic	113
4.1	Normal systems	114
	Exercises	121
4.2	Replacement and duality	125
	Exercises	130
4.3	The schemas D, T, B, 4, and 5	131
	Exercises	140
4.4	Modalities	147
	Exercises	155
4.5	Maximal sets in normal systems	157
	Exercises	160
5	Determination and decidability for normal systems	162
5.1	Soundness	162
	Exercises	165
5.2	Postscript on modalities	169
	Exercises	170
5.3	Completeness: basic theorems	171
	Exercises	174
5.4	Determination	175
	Exercises	180
5.5	$KG^{k,l,m,n}$	182
	Exercises	185
5.6	Decidability	187
	Exercises	189
6	Deontic logic	190
6.1	Standard deontic logic	190
	Exercises	192
6.2	Further principles	193
	Exercises	195

<i>Contents</i>	ix
6.3 Obligation and time	195
Exercises	198
6.4 Past tense obligation	198
Exercises	200
6.5 Shortcomings	200
Exercises	202
PART III	
7 Minimal models for modal logics	207
7.1 Minimal models	207
Exercises	210
7.2 The schemas M, C, and N	214
Exercises	217
7.3 Augmentation	220
Exercises	223
7.4 The schemas D, T, B, 4, and 5	223
Exercises	225
7.5 Filtrations	227
Exercises	229
8 Classical systems of modal logic	231
8.1 Classical systems	231
Exercises	233
8.2 Monotonic and regular systems	234
Exercises	240
8.3 Other schemas	245
Exercises	246
9 Determination and decidability for classical systems	248
9.1 Soundness	248
Exercises	250
9.2 Completeness: basic theorems	252
Exercises	255
9.3 Determination	257
Exercises	260
9.4 The schemas D, T, B, 4, and 5	261
Exercises	264
9.5 Decidability	264
Exercises	266
10 Conditional logic	268

10.1	Conditionality	268
	Exercises	270
10.2	Conditional obligation	272
	Exercises	275
10.3	Conditional obligation defined	275
	Exercises	276
	<i>Select bibliography</i>	278
	<i>Index of symbols</i>	281
	<i>Index of schemas, rules, and systems</i>	283
	<i>Index of subjects</i>	287
