

Contents

Preface	ix
Acknowledgments	xi
Introduction	1
0. Notation and the Expansion Theorem	9
1. Quantificational Language	9
2. Expansions and Domains	12
3. The Expansion Theorem	15
4. Further Notation	18
1. Basic Considerations about Expansions	19
1. Classes Specified by Truth-Functional Form of Matrix	19
2. Multiple Occurrences of Atoms in Expansions	24
3. Formula-Mappings	27
2. The Amenability Method	32
1. Introduction of the Method	32
2. The Monadic, Ackermann, and Minimal Gödel-Kalmár-Schütte Classes	36
3. The Adequacy Lemma	47
4. Skolem Classes	50
5. Initial x -Variables	64
6. Arbitrary Prefixes	66
7. Failure of Amenability	75
3. Finite Controllability	78
1. The Finite Model Lemma	78
2. Classes 1.1–1.6	79
3. Amiability; the Monadic, Ackermann, and Minimal Gödel- Kalmár-Schütte Classes	82
4. The Amiability Lemma	88
5. Skolem Classes	90
6. Class 2.8	102

4. The Maslov Class	108
1. Solvability	109
2. Finite Controllability	111
5. Solvability without Finite Controllability	119
1. $\forall\exists\forall$ -Classes Specified by Atomic Subformulas	120
2. $\forall\exists\forall$ -Classes Specified by Truth-Functional Form	126
3. Docility	130
6. Reductions	141
1. The Splitting Lemma and Its Applications	141
2. Solvable and Unsolvable Skolem Classes	146
3. Arbitrary Prefixes	159
4. Elimination of Initial x -Variables	164
5. Elimination of All but Dyadic Predicate Letters from $\forall\exists\forall$ -Schemata	168
7. Solvability and Coinstantiations	172
1. Coinstantiations Analyzed	173
2. Reductions to Monadic	182
3. Schemata with Few Atomic Subformulas	190
8. Schemata with Identity	198
1. Basic Facts	198
2. Solvability through Elimination of Identity	201
3. Monadic and Bernays-Schönfinkel Classes with Identity	209
4. The Gödel-Kalmár-Schütte Class with Identity	214
Appendix	226
1. Remarks on Condensability	226
2. Combinatorics	231
3. The $\forall\exists\forall$ -Krom Class	234
4. Finitely Controllable and Docile $\forall\exists\forall$ -Classes with Identity	244
5. An Extension of Class 5.1	250
6. More on the Gödel-Kalmár-Schütte Class with Identity	253
References	257
Index of Solvable Classes	263
Index of Special Notation	267
General Index	269
