Preface, xi

part I THE BASIC REGRESSION MODEL 1

Chapter 1 An Overview of Regression Analysis 2

- 1.1 What Is Econometrics? 2
- 1.2 What Is Regression Analysis? 6
- 1.3 The Estimated Regression Equation 16
- 1.4 A Simple Example of Regression Analysis 19
- 1.5 Using Regression to Explain Housing Prices 21
- 1.6 Summary and Exercises 24

Chapter 2 Ordinary Least Squares 35

- 2.1 Estimating Single-Independent-Variable Models with OLS 35
- 2.2 Estimating Multivariate Regression Models with OLS 40
- 2.3 Evaluating the Quality of a Regression Equation 49
- 2.4 Describing the Overall Fit of the Estimated Model 50
- 2.5 An Example of the Misuse of \bar{R}^2 56
- 2.6 Summary and Exercises 58

Chapter 3 Learning to Use Regression Analysis 66

- 3.1 Steps in Applied Regression Analysis 66
- 3.2 Using Regression Analysis to Pick Restaurant Locations 75
- 3.3 Summary and Exercises 82

Chapter 4 The Classical Model 88

- 4.1 The Classical Assumptions 88
- 4.2 The Sampling Distribution of $\hat{\beta}$ 97
- 4.3 The Gauss–Markov Theorem and the Properties of OLS Estimators 102
- 4.4 Standard Econometric Notation 104
- 4.5 Summary and Exercises 105

Chapter 5 Hypothesis Testing 112

- 5.1 What Is Hypothesis Testing? 113
- 5.2 The *t*-Test 121
- 5.3 Examples of *t*-Tests 130
- 5.4 Limitations of the *t*-Test 138
- 5.5 Summary and Exercises 142
- 5.6 Appendix: The *F*-Test 152

part II VIOLATIONS OF THE CLASSICAL ASSUMPTIONS 161

Chapter 6 Specification: Choosing the Independent Variables 162

- 6.1 Omitted Variables 163
- 6.2 Irrelevant Variables 170
- 6.3 An Illustration of the Misuse of Specification Criteria 173
- 6.4 Specification Searches 176
- 6.5 An Example of Choosing Independent Variables 181
- 6.6 Summary and Exercises 185
- 6.7 Appendix: Additional Specification Criteria 197

Chapter 7 Specification: Choosing a Functional Form 203

- 7.1 The Use and Interpretation of the Constant Term 204
- 7.2 Alternative Functional Forms 207
- 7.3 Lagged Independent Variables 220
- 7.4 Using Dummy Variables 222
- 7.5 Slope Dummy Variables 225
- 7.6 Problems with Incorrect Functional Forms 229
- 7.7 Summary and Exercises 232

Chapter 8 Multicollinearity 245

- 8.1 Perfect versus Imperfect Multicollinearity 246
- 8.2 The Consequences of Multicollinearity 250
- 8.3 The Detection of Multicollinearity 257
- 8.4 Remedies for Multicollinearity 260
- 8.5 Choosing the Proper Remedy 266
- 8.6 Summary and Exercises 273
- 8.7 Appendix: The SAT Interactive Regression Learning Exercise 285

Chapter 9 Serial Correlation 313

- 9.1 Pure versus Impure Serial Correlation 314
- 9.2 The Consequences of Serial Correlation 322
- 9.3 The Durbin–Watson d Test 325
- 9.4 Remedies for Serial Correlation 330
- 9.5 Summary and Exercises 335

Chapter 10 Heteroskedasticity 346

- 10.1 Pure versus Impure Heteroskedasticity 347
- 10.2 The Consequences of Heteroskedasticity 353
- 10.3 Testing for Heteroskedasticity 355
- 10.4 Remedies for Heteroskedasticity 362
- 10.5 A More Complete Example 369
- 10.6 Summary and Exercises 376

Chapter 11 A Regression User’s Handbook 390

- 11.1 A Regression User’s Checklist and Guide 391
- 11.2 Running Your Own Regression Project 395
- 11.3 Economic Data 398
- 11.4 The Ethical Econometrician 402
- 11.5 Practical Advice for Applied Econometricians 404
- 11.6 Summary 413
- 11.7 Appendix: The Housing Price Interactive Exercise 414

part III EXTENSIONS OF THE BASIC REGRESSION MODEL 419

Chapter 12 Time-Series Models 420

- 12.1 Dynamic Models 421
- 12.2 Serial Correlation and Dynamic Models 427
- 12.3 Granger Causality 431
- 12.4 Spurious Correlation and Nonstationarity 432
- 12.5 Summary and Exercises 441

Chapter 13 Dummy Dependent Variable Techniques 447

- 13.1 The Linear Probability Model 447
- 13.2 The Binomial Logit Mode 454

- 13.3 Other Dummy Dependent Variable Techniques 461
- 13.4 Summary and Exercises 464

Chapter 14 Simultaneous Equations 474

- 14.1 Structural and Reduced-Form Equations 475
- 14.2 The Bias of Ordinary Least Squares (OLS) 481
- 14.3 Two-Stage Least Squares (2SLS) 485
- 14.4 The Identification Problem 494
- 14.5 Summary and Exercises 499
- 14.6 Appendix: Errors in the Variables 507

Chapter 15 Forecasting 511

- 15.1 What Is Forecasting? 512
- 15.2 More Complex Forecasting Problems 517
- 15.3 ARIMA Models 525
- 15.4 Summary and Exercises 528

Chapter 16 Statistical Principles 533

(written by Gary Smith)

- 16.1 Probability Distributions 533
- 16.2 Sampling 547
- 16.3 Estimation 551
- 16.4 Hypothesis Tests 559
- 16.5 Summary and Exercises 566

Appendix A Answers to Even-Numbered Exercises 573

Appendix B Statistical Tables 609

Index 625
