Abstract	23
1 Introduction	25
1.1 Background	25
1.2 Problem and aim of this work	26
1.3 Approach	27
1.3.1 Preceding considerations	27
1.3.2 Chapters summary	28
1.4 Definitions and formal comments	30
1.4.1 Terms and definitions around gas transmission network access regulation	30
1.4.1.1 Liberalisation and privatisation	30
1.4.1.2 Regulation and de-regulation	30
1.4.1.3 Gas transmission, gas transmission networks and third party access	31
1.4.2 Formalities	31
2 Characterisation of gas transmission networks	33
2.1 Physical characteristics of gas transmission	33
2.1.1 History	33
2.1.1.1 The discovery of gas as an energy source	33
2.1.1.2 First steps of gas transportation	33
2.1.2 Transport stages	34
2.1.2.1 Production and processing	35
2.1.2.2 Transmission	35
2.1.2.3 Distribution	37
2.1.3 Transmission functions	38
2.1.4 Transmission facilities	39
2.1.4.1 Pipelines	39
2.1.4.2 Compressor stations	40
2.1.4.3 Regulation and metering stations	42
2.1.4.4 System control	42
2.1.4.5 Storage facilities	43
2.1.5 Physical conditions of gas conveyance	43
2.1.6 Transmission capacity	45
2.2 Economic characteristics of gas transmission	46
2.2.1 The product of gas	46
2.2.1.1 Origin of natural gas	46

2.2.1.2	Consistency of natural gas	47
2.2.1.3	Natural gas use	48
2.2.1.4	Transportation	48
2.2.2	The value chain of the natural gas market	49
2.2.3	Costs of natural gas transmission	51
2.2.3.1	A gas transmission cost topology	51
2.2.3.2	Fixed, sunk and marginal costs in gas transmission	53
2.3	Are gas transmission systems natural monopolies?	55
2.3.1	Theory of natural monopoly	55
2.3.1.1	Introduction and emergence of natural monopolies	55
2.3.1.2	Economies of scale and natural monopoly	57
2.3.1.3	Diseconomies of scale and natural monopoly	58
2.3.2	Application to gas transmission	61
2.3.2.1	Poor empirical evidence	61
2.3.2.2	Economies of scale in gas transmission	62
2.3.2.3	Cost subadditivity and natural monopolies?	63
2.3.2.4	Conclusions	70
3	Gas markets in the European Union	73
3.1	Introduction	73
3.2	Overview of the national gas markets	73
3.2.1	Austria	73
3.2.1.1	Overview of the Austrian gas market	73
3.2.1.2	Market structure in Austria	74
3.2.1.3	The Austrian gas network	74
3.2.2	Belgium	75
3.2.2.1	Overview of the Belgian gas market	75
3.2.2.2	Market structure in Belgium	75
3.2.2.3	The Belgian gas network	76
3.2.3	France	76
3.2.3.1	Overview of the French gas market	76
3.2.3.2	Market structure in France	77
3.2.3.3	The French gas network	77
3.2.4	Germany	78
3.2.4.1	Overview of the German gas market	78
3.2.4.2	Market structure in Germany	78
3.2.4.3	The German gas network	79
3.2.5	Italy	79
3.2.5.1	Overview of the Italian gas market	79
3.2.5.2	Market structure in Italy	80
3.2.5.3	The Italian gas network	80
3.2.6	Netherlands	80
3.2.6.1	Overview of the Dutch gas market	80
3.2.6.2	Market structure in the Netherlands	81

3.2.6.3	The Dutch gas network	82
3.2.7	Spain	82
3.2.7.1	Overview of the Spanish gas market	82
3.2.7.2	Market structure in Spain	83
3.2.7.3	The Spanish gas network	83
3.2.8	United Kingdom	83
3.2.8.1	Overview of the gas market in the United Kingdom	83
3.2.8.2	Market structure in the United Kingdom	84
3.2.8.3	The gas network in the United Kingdom	84
3.2.9	Scandinavia	85
3.2.9.1	Overview of the Scandinavian gas market	85
3.2.9.2	Market structure in Scandinavia	86
3.2.9.3	The Scandinavian gas network	86
3.2.10	Eastern Europe	87
3.2.10.1	Overview of the East-European gas market	87
3.2.10.2	Market structure in Eastern Europe	88
3.2.10.3	The East-European gas network	88
3.3	The European Interconnected Transmission System (EITS)	89
3.3.1	Overview of the EITS and its role in European liberalisation policy	89
3.3.2	Interconnection of single markets	91
3.3.2.1	Cross border point capacities	91
3.3.2.2	Gas hubs	92
3.3.2.3	Role of import and transit	93
3.3.3	Technical differences between national transmission systems	95
3.3.3.1	Pressure differences	95
3.3.3.2	Differences in gas qualities	96
3.3.3.3	Different balancing practices	97
3.3.3.4	Storage options	
3.4	Overall comparability of the European gas markets and their transmission systems	98
3.4.1	Background	98
3.4.2	National particularities and their impact on the gas market development	99
3.4.3	Criteria of market comparison	100
3.4.4	Criteria of transmission network comparison	101
4	Access to gas transmission networks	103
4.1	Relevant European legislation and legislative process	103
4.1.1	The gas directives	103
4.1.2	Relevant institutions	104
4.1.3	Network access regulation as a key instrument	105
4.2	Components of gas transmission network access	107
4.2.1	Physical and pricing side	107
4.2.2	Introduction to network access models	109
4.2.2.1	Overview	109

4.2.2.2	Capacity allocation	111
4.2.2.3	Capacity pricing	113
4.2.2.4	Point-to-point, entry-exit, postage stamp	114
4.3	Status quo	115
4.3.1	Overview and data sources	115
4.3.2	Liberalisation framework	116
4.3.2.1	Market opening and reciprocity	116
4.3.2.2	Unbundling	117
4.3.3	Network access	118
4.3.3.1	Specification and monitoring process	118
4.3.3.2	Network access model	120
4.3.4	Situation in relevant countries outside the European Union	122
4.3.4.1	Gas supply countries outside EU	122
4.3.4.2	Integration of European Union non-members	122
4.4	The vision behind network access regulation	124
4.4.1	Superior objective of gas market reforms, the role of network access, time horizon and emerging questions	124
4.4.2	Long-term vision: Identification, evaluation and a concluding hypothesis	125
4.4.2.1	Identification of a long-term vision for the European gas market	125
4.4.2.2	Critical questions and a concluding hypothesis	127
5	Competition in the gas industry	129
5.1	Introduction to this chapter and the term ‘competition’	129
5.2	Methods for a competition diagnosis	131
5.2.1	Preliminary remarks	131
5.2.2	Test of market results	132
5.2.3	Test of market behaviour	133
5.2.4	Test of market structure	133
5.2.5	Coherences between the three tests and current trends	134
5.3	Selected competition concepts	135
5.3.1	Introduction	135
5.3.2	Classical ideas on competition	135
5.3.3	The model of perfect competition	136
5.3.4	The workable competition approach	138
5.3.4.1	Clark’s remedial imperfections	138
5.3.4.2	Kantzenbach’s market structure approach	139
5.3.5	Barriers to entry and contestable markets	139
5.3.5.1	Barriers to entry according to Bain and Stigler	139
5.3.5.2	Contestable markets	140
5.3.6	Competition as a discovery procedure	141
5.3.7	Competition as a process of creative destruction	142
5.4	Critical assessment and gas market applicability of competition concepts	143

5.4.1	General critique in welfare-economic approaches	143
5.4.2	Excursus: New approaches from a philosophy-of-science view	144
5.4.3	Limitations through a static perspective	145
5.4.4	Usefulness for and applicability to gas (transmission) markets	147
5.5	Gas market-specific competition levels	150
5.5.1	Overview	150
5.5.2	Competition of gas to other fuels/energy sources and oil price-coupled gas prices	151
5.5.3	Gas to gas competition – commodity	151
5.5.4	Gas to gas competition – transport	152
5.5.4.1	Significance	152
5.5.4.2	Pipe-to-pipe/System-to-system competition	152
5.5.4.3	Pipe-in-pipe competition	153
5.6	Examination of the European Commission’s competition understanding	153
5.6.1	Competition definition, goals and functions in the European gas market	153
5.6.2	Competition diagnosis by the European Commission	154
5.6.3	Underlying competition paradigms/concept	156
5.7	Institutional organisation of gas industries	157
5.7.1	Meaning of an institutional gas market organisation	157
5.7.2	Transaction cost economics	157
5.7.3	State-owned vertically integrated monopoly	159
5.7.4	Private vertically integrated firm	161
5.7.5	Vertical separation of the network stage(s)	164
5.8	Sector-specific competition evaluation in the case of a vertically separated gas market	165
5.8.1	Developing a model of competitive forces	165
5.8.2	Political competition environment along the value chain and conclusions for a competition evaluation on transmission and trading stage	168
5.8.3	Gas transmission networks: Prerequisite to competition	170
5.8.3.1	Criteria for the possibility to enable competition	170
5.8.3.2	Competitive forces on gas transmission networks	171
5.8.4	Competitive gas trading	173
6	Transmission network access regulation	175
6.1	Purposes of regulation	175
6.1.1	Introduction to and general purposes of regulation	175
6.1.2	Origin of European gas network access regulation	176
6.2	Fundamental regulatory decisions	177
6.2.1	Deregulation and (re-)regulation: Two sides of the same coin	177
6.2.2	Ex ante (regulation) versus ex post (control)	178
6.2.3	Traditional versus new regulation theory	179
6.2.4	Global/End-to-end regulation versus disaggregated approach	180
6.2.4.1	Background	180
6.2.4.2	Global/End-to-end regulation exemplarily for ECPR and global price cap	181

6.2.4.3	The theory of monopolistic bottlenecks and the disaggregated approach	182
6.3	Overview of network regulation instruments	183
6.4	Market-structural intervention	185
6.5	Setting network access standards on the capacity side	187
6.5.1	Network access model	187
6.5.2	Potential further regulatory means	188
6.5.2.1	Efficient network use	188
6.5.2.2	Balancing regulations	189
6.5.2.3	Other regulations	189
6.6	Network access price regulation	190
6.6.1	Traditional price regulation methods	190
6.6.1.1	Regulation of prices according to marginal costs	190
6.6.1.2	Regulation of prices according to average costs	191
6.6.1.3	Ramsey pricing	192
6.6.1.4	Critique in traditional regulation methods	193
6.6.2	Cost-based regulation instruments	193
6.6.2.1	Overview	193
6.6.2.2	Rate-of-return regulation	194
6.6.2.3	Cost-plus regulation	195
6.6.3	Incentive-based regulation instruments	196
6.6.3.1	Development towards “modern incentive regulation”	196
6.6.3.2	Price caps	197
6.6.3.3	Yardstick competition	199
6.6.3.4	Overview of benchmarking methods	200
6.7	Effects and effectiveness	201
6.7.1	Preliminary remarks and assumptions	201
6.7.2	Evaluation of regulatory instruments with regard to their contribution to the achievement of non-discriminatory network access	203
6.7.2.1	Flexible capacity access	203
6.7.2.2	Cost-reflective capacity pricing	205
6.7.3	Regulatory recommendation	207
6.7.3.1	Introduction and regulatory recommendation scheme	207
6.7.3.2	Recommendations regarding network access standards and price regulation	210
6.7.4	How successful can gas transmission network access regulation ever be?	212
7	Conclusions	215
7.1	Summarised results	215
7.2	Final recommendation and thoughts for further research	217
