CONTENTS

Preface vii

Modular Forms on Noncongruence Subgroups
By A. O. L. Atkin and H. P. F. Swinnerton-Dyer 1

Selfconjugate Tetrahedra with Respect to the Hermitian Variety $x_0^3+x_1^3+x_2^3+x_3^3=0$ in PG(3, 2^2) and a Representation of PG(3, 3)
By R. C. Bose 27

Multipartitions and Multipermutations
By M. S. Cheema and T. S. Motzkin 39

Simplicial Geometries
By Henry H. Crapo and Gian-Carlo Rota 71

Problems and Results in Combinatorial Analysis
By P. Erdös 77

Multirowed Partitions with Strict Decrease along Columns (Notes on Plane Partitions. IV)
By Basil Gordon 91

Rota's Geometric Analogue to Ramsey's Theorem
By R. L. Graham and B. Rothschild 101

Combinatorial Representations of Abelian Groups
By Alfred W. Hales 105

Designs with Transitive Automorphism Groups
By Marshall Hall, Jr. 109

Truncated Finite Planes
By Haim Hanani 115

Homogeneous 0-1 Matrices
By Alexander Hurwitz 121

The Greedy Algorithm for Finitary and Cofinitary Matroids
By Victor Klee 137

Collections of Subsets Containing no Two Sets and Their Union
By Daniel Kleitman 153

A Combinatorial Method for Embedding a Group in a Semigroup
By N. S. Mendelsohn 157

Asymptotics of Tournament Scores
By Leo Moser 165

Sorting Numbers for Cylinders and Other Classification Numbers
By Theodore S. Motzkin 167

Pathological Latin Squares
By E. T. Parker 177
Some Problems in the Partition Calculus
By Richard Rado 183
Solution of Kirkman's Schoolgirl Problem
By D. K. Ray-Chaudhuri and Richard M. Wilson 187
A Generalization of Ramsey's Theorem
By Bruce Rothschild 205
Nonaveraging Sets
By E. G. Straus 215
On (k, l)-Coverings and Disjoint Systems
By J. D. Swift 223
(1, 2, 4, 8)—Sums of Squares and Hadamard Matrices
By Olga Taussky 229
Dichromatic Sums for Rooted Planar Maps
By W. T. Tutte 235

Author Index 247

Subject Index 251
