

CONTENTS

PREFACE	vii
PART I. LATTICE STRUCTURE THEORY	
Structure and decomposition theory of lattices By R. P. DILWORTH	3
Status of word problems for lattices By P. M. WHITMAN	17
Generalized partitions and lattice embedding theorems By JURIS HARTMANIS	22
Sublattices of free lattices By R. A. DEAN	31
Prime ideal characterization of generalized Post algebras By C. C. CHANG and ALFRED HORN	43
PART II. COMPLEMENTED MODULAR LATTICES	
Complemented modular lattices By ISRAEL HALPERIN	51
Extensions of von Neumann's coordinatization theorem By B. JÓNSSON	65
Coordinates in non-Desarguesian complemented modular lattices By K. D. FRYER	71
The normal completion of a complemented modular point lattice By J. E. McLAUGHLIN	78
PART III. BOOLEAN ALGEBRAS	
Cylindric algebras By LEON HENKIN and ALFRED TARSKI	83
Injective and projective Boolean algebras By P. R. HALMOS	114

Cardinal and ordinal multiplication of relation types	123
By C. C. CHANG	
Some questions about complete Boolean algebras	129
By R. S. PIERCE	
Retracts in Boolean algebras	141
By PHILIP DWINGER	
PART IV. APPLICATIONS OF LATTICE THEORY	
Lattices in applied mathematics	155
By GARRETT BIRKHOFF	
On the lattice of normal subgroups of a group	185
By MARSHALL HALL, JR.	
Locally compact topological lattices	195
By L. W. ANDERSON	
Function lattices	198
By F. W. ANDERSON	
INDEX	205
