

CONTENTS

	PAGE
INTRODUCTION	
<i>p</i> -Length Theorems	1
By G. HIGMAN	
Arithmetical and Normal Structure of Finite Groups.	17
By H. WIELANDT and B. HUPPERT	
Combinatorial Analysis. <i>t</i> -Designs and Permutation Groups	39
By D. R. HUGHES	
On Orthogonal Latin Squares	43
By E. T. PARKER	
Automorphisms of Steiner Triple Systems	47
By M. HALL, JR.	
Group Characters. Exceptional Characters	67
By W. FEIT	
Modular Representations of Finite Groups	71
By W. F. REYNOLDS	
The Constructive Reduction of Finite Group Representations	89
By J. S. FRAME	
Applications of Group Characters	101
By M. SUZUKI	
Contributions to the Theory of Finite Groups	107
By M. SUZUKI	
A Family of Simple Groups Associated with the Simple Lie Algebra of Type (G_2)	111
By R. REE	
INDEX	113
