CONTENTS

Part I	Preface Basic Thoughts and Equations	xix
1	Philosophy of Computational Fluid Dynamics	3
	1.1 Computational Fluid Dynamics: Why?	<i>3</i>
	1.2 Computational Fluid Dynamics as a Research Tool	6
	1.3 Computational Fluid Dynamics as a Design Tool	9
	1.4 The Impact of Computational Fluid Dynamics—Some Other	
	Examples	13
	1.4.1 Automobile and Engine Applications	14
	1.4.2 Industrial Manufacturing Applications	17
	1.4.3 Civil Engineering Applications	19
	1.4.4 Environmental Engineering Applications	20
	1.4.5 Naval Architecture Applications (Submarine Example)	22
	1.5 Computational Fluid Dynamics: What Is It?	23
	1.6 The Purpose of This Book	32
2	The Governing Equations of Fluid Dynamics: Their Derivation, a Discussion of Their Physical Meaning, and a Presentation of Forms Particularly Suitable to CFD 2.1 Introduction 2.2 Models of the Flow 2.2.1 Finite Control Volume 2.2.2 Infinitesimal Fluid Element 2.2.3 Some Comments 2.3 The Substantial Derivative (Time Rate of Change Following a Moving Fluid Element 2.4 The Divergence of the Velocity: Its Physical Meaning	37 38 40 41 42 42 43
	2.4.1 A Comment	48

4.2

Introduction to Finite Differences

	2.5 The Continuity Equation	49
	2.5.1 Model of the Finite Control Volume Fixed in Space	49
	2.5.2 Model of the Finite Control Volume Moving with the	
	Fluid	51
	2.5.3 Model of an Infinitesimally Small Element Fixed	
	in Space	53
	2.5.4 Model of an Infinitesimally Small Fluid Element	
	Moving with the Flow	55
	2.5.5 All the Equations Are One: Some Manipulations	56
	2.5.6 Integral versus Differential Form of the Equations:	
	An Important Comment	60
	2.6 The Momentum Equation 2.7 The Energy Equation	60
	1 107	66
	2.8 Summary of the Governing Equations for Fluid Dynamics: With Comments	75
		75
	2.8.1 Equations for Viscous Flow (the Navier-Stokes Equations)	75
	2.8.2 Equations for Inviscid Flow (the Euler Equations)	77
	2.8.3 Comments on the Governing Equations	78
	2.9 Physical Boundary Conditions	80
	2.10 Forms of the Governing Equations Particularly Suited for	80
	CFD: Comments on the Conservation Form, Shock Fitting,	
	and Shock Capturing	82
	2.11 Summary	92
	Problems	93
3	Mathematical Behavior of Partial Differential	
J	Equations: The Impact on CFD	95
	3.1 Introduction	95
	3.2 Classification of Quasi-Linear Partial Differential Equations	93 97
	3.3 A General Method of Determining the Classification of	91
	Partial Differential Equations: The Eigenvalue Method	102
	3.4 General Behavior of the Different Classes of Partial	102
	Differential Equations: Impact on Physical and	
	Computational Fluid Dynamics	105
	3.4.1 Hyperbolic Equations	106
	3.4.2 Parabolic Equations	111
	3.4.3 Elliptic Equations	117
	3.4.4 Some Comments: The Supersonic Blunt Body	11,
	Problem Revisited	119
	3.5 Well-Posed Problems	120
	3.6 Summary	121
	Problems	121
Part II	Basics of the Numerics	
4	Basic Aspects of Discretization	125
	4.1 Introduction	125

125

128

4.4 Explicit and Implicit Approaches: Definitions and Contrasts	42 45 53
4.4 Explicit and Implicit Approaches: Definitions and Contrasts	45 53
	65
4.6 Summary	65
GUIDEPOST 10	66
Problems 10	67
5 Grids with Appropriate Transformations	68
	68
	71
5.2 Metrics and Jacobians	78
5.4 Form of the Governing Equations Particularly Suited	
	83

6 Some Simple CFD Techniques: A Beginning 21	16
6.1 Introduction 21	16
	17
6.3 MacCormack's Technique 22	22
GUIDEPOST 22	23
6.4 Some Comments: Viscous Flows, Conservation Form,	
• • • • • • • • • • • • • • • • • • • •	25
6.4.1 Viscous Flows 22	25
	25
6.4.3 Space Marching 22	26
6.5 The Relaxation Technique and Its Use with Low-Speed	
Inviscid Flow 22	29
6.6 Aspects of Numerical Dissipation and Dispersion; Artificial Viscosity 23	
6.7 The Alternating-Direction-Implicit (ADI) Technique 24 6.8 The Pressure Correction Technique: Application	+5
to Incompressible Viscous Flow 24	47
6.8.1 Some Comments on the Incompressible	7 /
Navier-Stokes Equations 24	48

	6.8.2 Some Comments on Central Differencing of the Incompressible Navier–Stokes Equations; The Need	
	for a Staggered Grid	250
	6.8.3 The Philosophy of the Pressure Correction Method	253
	6.8.4 The Pressure Correction Formula	254
	6.8.5 The Numerical Procedure: The SIMPLE Algorithm 6.8.6 Boundary Conditions for the Pressure Correction	261
	Method	262
	GUIDEPOST	264
	6.9 Some Computer Graphic Techniques Used in CFD	264
	6.9.1 xy Plots	264
	6.9.2 Contour Plots	265
	6.9.3 Vector and Streamline Plots	270
	6.9.4 Scatter Plots	273
	6.9.5 Mesh Plots	273
	6.9.6 Composite Plots	274
	6.9.7 Summary on Computer Graphics	274
	6.10 Summary Problems	277 278
Part III	Some Applications	
Part III	Numerical Solutions of Quasi-One-Dimensional	292
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows	283
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III	283 283
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic	283
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow	
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow	283
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle	283 285
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique	283 285 288
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution	283 285 288 288
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution 7.4 CFD Solution of Purely Subsonic Isentropic Nozzle Flow	283 285 288 288 308
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution 7.4 CFD Solution of Purely Subsonic Isentropic Nozzle Flow 7.4.1 The Setup: Boundary and Initial Conditions	283 285 288 288 308 313 325 327
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution 7.4 CFD Solution of Purely Subsonic Isentropic Nozzle Flow 7.4.1 The Setup: Boundary and Initial Conditions 7.4.2 Final Numerical Results: MacCormack's Technique	283 285 288 288 308 313 325 327 330
<u> </u>	Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution 7.4 CFD Solution of Purely Subsonic Isentropic Nozzle Flow 7.4.1 The Setup: Boundary and Initial Conditions 7.4.2 Final Numerical Results: MacCormack's Technique 7.4.3 The Anatomy of a Failed Solution	283 285 288 288 308 313 325 327
<u> </u>	 Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution 7.4 CFD Solution of Purely Subsonic Isentropic Nozzle Flow 7.4.1 The Setup: Boundary and Initial Conditions 7.4.2 Final Numerical Results: MacCormack's Technique 7.4.3 The Anatomy of a Failed Solution 7.5 The Subsonic-Supersonic Isentropic Nozzle Solution 	283 285 288 288 308 313 325 327 330
<u> </u>	 Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution 7.4 CFD Solution of Purely Subsonic Isentropic Nozzle Flow 7.4.1 The Setup: Boundary and Initial Conditions 7.4.2 Final Numerical Results: MacCormack's Technique 7.4.3 The Anatomy of a Failed Solution 7.5 The Subsonic-Supersonic Isentropic Nozzle Solution Revisited: The Use of the Governing Equations in 	283 285 288 288 308 313 325 327 330 325
<u> </u>	 Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution 7.4 CFD Solution of Purely Subsonic Isentropic Nozzle Flow 7.4.1 The Setup: Boundary and Initial Conditions 7.4.2 Final Numerical Results: MacCormack's Technique 7.4.3 The Anatomy of a Failed Solution 7.5 The Subsonic-Supersonic Isentropic Nozzle Solution Revisited: The Use of the Governing Equations in Conservation Form 	283 285 288 288 308 313 325 327 330 325
<u> </u>	 Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution 7.4 CFD Solution of Purely Subsonic Isentropic Nozzle Flow 7.4.1 The Setup: Boundary and Initial Conditions 7.4.2 Final Numerical Results: MacCormack's Technique 7.4.3 The Anatomy of a Failed Solution 7.5 The Subsonic-Supersonic Isentropic Nozzle Solution Revisited: The Use of the Governing Equations in Conservation Form 7.5.1 The Basic Equations in Conservation Form 	283 285 288 288 308 313 325 327 330 325
<u> </u>	 Numerical Solutions of Quasi-One-Dimensional Nozzle Flows 7.1 Introduction: The Format for Chapters in Part III 7.2 Introduction to the Physical Problem: Subsonic-Supersonic Insentropic Flow 7.3 CFD Solution of Subsonic-Supersonic Isentropic Nozzle Flow: MacCormack's Technique 7.3.1 The Setup 7.3.2 Intermediate Results: The First Few Steps 7.3.3 Final Numerical Results: The Steady-State Solution 7.4 CFD Solution of Purely Subsonic Isentropic Nozzle Flow 7.4.1 The Setup: Boundary and Initial Conditions 7.4.2 Final Numerical Results: MacCormack's Technique 7.4.3 The Anatomy of a Failed Solution 7.5 The Subsonic-Supersonic Isentropic Nozzle Solution Revisited: The Use of the Governing Equations in Conservation Form 7.5.1 The Basic Equations in Conservation Form 7.5.2 The Setup 	283 285 288 288 308 313 325 327 330 325
