Contents

Preface xi

List of participants xix

Part I. Theory

Interpolation spaces and optimal multilevel preconditioners
FOLKMAR A. BORNEMANN 3

Two-level additive Schwarz preconditioners for nonconforming finite elements
SUSANNE C. BRENNER 9

Two proofs of convergence for the combination technique for the efficient solution of sparse grid problems
H.-J. BUNGARTZ, M. GRIEBEL, D. RÖSCHKE, AND C. ZENGER 15

Domain decomposition methods for monotone nonlinear elliptic problems
XIAO-CHUAN CAI AND MAKSYMILIAN DRYJA 21

Cascadic conjugate gradient methods for elliptic partial differential equations: Algorithm and numerical results
PETER DEUFLHARD 29

Multilevel methods for elliptic problems with discontinuous coefficients in three dimensions
MAKSYMILIAN DRYJA 43

Multilevel methods for elliptic problems on domains not resolved by the coarse grid
RALF KORNHUBER AND HARRY YSERENTANT 49

Three-dimensional domain decomposition methods with nonmatching grids and unstructured coarse solvers
P. LE TALLEC, T. SASSI, AND M. VIDRASCU 61

Domain decomposition for elliptic problems with large condition numbers
S. V. NEPOMNYASCHIKH 75

Stable subspace splittings for Sobolev spaces and domain decomposition algorithms
P. OSWALD 87

A wire basket based method for spectral elements in three dimensions
LUCA F. PAVARINO 99

An analysis of spectral graph partitioning via quadratic assignment problems
ALEX POTHEN 105

Error estimators based on stable splittings
U. RÜDE 111

Multilevel methods for P_1 nonconforming finite elements and discontinuous coefficients in three dimensions
MARCUS SARKIS 119

On generalized Schwarz coupling applied to advection-dominated problems
K. H. TAN AND M. J. A. BORSBOOM 125

Exotic coarse spaces for Schwarz methods for lower order and spectral finite elements
OLOF B. WIDLUND 131

Part II. Algorithms

Preconditioning via asymptotically-defined domain decomposition
S. F. ASHBY, C. T. KELLEY, P. E. SAYLOR, AND J. S. SCROGGS 139

A spectral Stokes solver in domain decomposition methods
M. AZAIEZ AND A. QUARTERONI 151

Preconditioned iterative methods in a subspace for linear algebraic equations with large jumps in the coefficients
NIKOLAI S. BAKHVALOV AND ANDREW V. KNYAZEV 157

The hierarchical basis multigrid method and incomplete LU decomposition
RANDOLPH E. BANK AND JINCHAO XU 163

Domain decomposition and multigrid algorithms for elliptic problems on unstructured meshes
TONY F. CHAN AND BARRY F. SMITH 175

Two-grid methods for mixed finite element approximations of nonlinear parabolic equations
CLINT N. DAWSON AND MARY F. WHEELER 191

Domain decomposition algorithms for PDE problems with large scale variations
LUC GIRAUD AND RAY S. TUMINARO 205

A one shot domain decomposition/fictitious domain method for the Navier-Stokes equations
ROLAND GLOWINSKI, TSORNG-WHAY PAN, AND JACQUES PÉRIAUX 211

Domain-oriented multilevel methods
M. GRIEBEL 223

Multigrid and domain decomposition methods for electrostatics problems
MICHAEL HOLST AND FAISAL SAIED 231

A parallel subspace decomposition method for hyperbolic equations
EDGAR KATZER 239

Numerical treatments for the Helmholtz problem by domain decomposition techniques
SEONGJAI KIM 245

Schwarz methods for obstacle problems with convection-diffusion operators
YU. A. KUZNETSOV, P. NEITTAANMÄKI, AND P. TARVAINEN 251

On domain decomposition and shooting methods for two-point boundary value problems
C.-H. LAI 257

Robust methods for highly nonsymmetric problems
W. LAYTON, J. MAUBACH, AND P. RABIER 265

Domain decomposition via the Sinc-Galerkin method for second order differential equations
NANCY J. LYBECK AND KENNETH L. BOWERS 271

A bisection method to find all solutions of a system of nonlinear equations
PETR MEJZLÍK 277

Preconditioning cell-centered finite difference equations on grids with local refinement
ILYA. D. MISHEV 283

Outflow boundary conditions and domain decomposition method
F. NATAF AND F. ROGIER 289

Domain decomposition for adaptive *hp* finite element methods
J. TINSLEY ODEN, ABANI PATRA, AND YUSHENG FENG 295

Domain decomposed preconditioners with Krylov subspace methods as subdomain solvers
MICHAEL PERNICE 303

Elliptic preconditioners using fast summation techniques
L. RIDGWAY SCOTT 311

The modified vertex space domain decomposition method for Neumann boundary value problems
JIAN PING SHAO 325

A multi-color splitting method and convergence analysis for local grid refinement
TSI-MIN SHIH, CHIN-BO LIEM, TAO LU, AND AIHUI ZHOU 337

Boundary elements in domain decomposition methods
OLAF STEINBACH 343

An overdetermined Schwarz alternating method
VICTOR H. SUN AND WEI-PAI TANG 349

Domain decomposition for linear and nonlinear elliptic problems via function or space decomposition
XUE-CHENG TAI 355

ELLAM-based domain decomposition and local refinement techniques for advection-diffusion equations with interfaces
H. WANG, H. K. DAHLE, R. E. EWING, T. LIN, AND J. E. VÅG 361

Part III. Parallelism

Parallel domain decomposition applied to coupled transport equations
PETTER E. BJØRSTAD, W. M. COUGHRAN, JR., AND ERIC GROSSE 369

MENUS-PGG: A mapping environment for unstructured and structured numerical parallel grid generation
NIKOS CHRISOCHOIDES, GEOFFREY FOX, AND JOE THOMPSON 381

A comparison of three iterative algorithms based on domain decomposition methods
PATRICK CIARLET, JR. 387

IBLU preconditioners for massively parallel computers
E. DE STURLER 395

Tailoring domain decomposition methods for efficient parallel coarse grid solution and for systems with many right hand sides
CHARBEL FARHAT AND PO-SHU CHEN 401

Analysis and implementation of DD methods for parallel FE computations
HAI XIANG LIN 407

Finite-element/Newton method for solution of nonlinear problems in transport processes using domain decomposition and nested dissection on MIMD parallel computers
M. REZA MEHRABI AND ROBERT A. BROWN 413

Modeling with collaborating PDE solvers: Theory and practice
MO MU AND JOHN R. RICE 427

Parallelization of a multigrid solver via a domain decomposition method
FRANCOIS-XAVIER ROUX AND DAMIEN TROMEUR-DERVOUT 439

A compiler for parallel finite element methods with domain-decomposed unstructured meshes
JONATHAN RICHARD SHEWCHUK AND OMAR GHATTAS 445

Part IV. Applications

A χ-formulation of the viscous-inviscid domain decomposition for the Euler/Navier-Stokes equations
RENZO ARINA AND CLAUDIO CANUTO 453

Domain decomposition and computation of two dimensional detonation waves
WEI CAI 459

Parallel implicit methods for aerodynamics
X.-C. CAI, W. D. GROPP, D. E. KEYES, AND M. D. TIDRIRI 465

Parallel domain-decomposed preconditioners in finite element shallow water flow modeling
Y. CAI AND I. M. NAVON 471

A domain decomposition method for Bellman equations
F. CAMILLI, M. FALCONE, P. LANUCARA, AND A. SEGHINI 477

Domain decomposition for the shallow water equations
J. G. CHEFTER, C. K. CHU, AND D. E. KEYES 485

Domain decomposition methods for device modelling
R. K. COOMER AND I. G. GRAHAM 491

An efficient computational method for the flow past an airfoil
GEORGE C. HSIAO, MICHAEL D. MARCOZZI, AND SHANGYOU ZHANG 497

Newton-Krylov-Schwarz techniques applied to the two-dimensional incompressible Navier-Stokes and energy equations
P. G. JACOBS, V. A. MOUSSEAU, P. R. MCHUGH, AND D. A. KNOLL 503

Direct numerical simulation of jet flow via a multi-block technique
H. C. KU, H. E. GILREATH, R. RAUL, AND J. C. SOMMERER 509

Balancing domain decomposition for plates
PATRICK LE TALLEC, JAN MANDEL, AND MARINA VIDRASCU 515

Nonlinear block iterative solution of semiconductor device equations by a domain decomposition method
S. MICHELETTI, A. QUARTERONI, AND R. SACCO 525

A direct Chebyshev multidomain method for flow computation with application to rotating systems
I. RASPO, J. OUAZZANI, AND R. PEYRET 533

Multi-domain Fourier algorithms for parallel solution of the Navier-Stokes equations
L. VOZOVOI, M. ISRAELI, AND A. AVERBUCH 539
