

CONTENTS

1. Quantile processes and sums of weighted spacings for composite goodness-of-fit, I and II, by Miklós Csörgő and Pál Révész, 76 pages.
2. On a test for goodness-of-fit based on the empirical probability measure of Foutz and testing for exponentiality, by Miklós Csörgő, 14 pages.
3. A preliminary version of the preliminary version of an invariance principle for N.N. empirical density functions, by Miklós Csörgő and Pál Révész, 23 pages.
