

Non-equilibrium Statistical Mechanics

and

Global Analysis

Miroslav Grmela

I	Classical Many Body Problem	
§1	Classical Mechanics	1
§2	Orbit Space - The General Many Body Problem	6
§3	Phenomenological Theories	11
II	Liouville-Koopman Representation of Classical Mechanics, Non-equilibrium Statistical Mechanics	
§4	Liouville-Koopman Representation of Hamiltonian Dynamics	14
§5	Hille-Yoshida Theory of Semi-groups	25
§6	BBGKY (Bogoliubov-Born-Green-Kirkwood-Yvon) Hierarchy	30
§7	Time Independent Solutions	39
§8	The Concept of Stability in Global Analysis and Non-equilibrium Statistical Mechanics	44
III	Macroscopic Phenomenological Theories	
§9	Kinetic Theory	56
§10	Thermodynamics	70
