INTRODUCTION	<i>xi</i>
1. SYSTEMS WITH EXTERNAL VARIABLES	1
1.1 Some remarks on the description of physical systems	1
1.2 Set-theoretic mathematical models	7
<i>Notes and References for Chapter 1</i>	18
2. SMOOTH DYNAMICAL SYSTEMS	19
2.1 Linear systems	20
2.1.1 Linear systems in state space form	20
2.1.2 External linear systems	23
2.1.3 External linear systems in the frequency domain	26
2.2 Nonlinear systems	45
2.2.1 Nonlinear systems in state space form	45
2.2.2 Minimality, observability and controllability	54
2.2.3 Controlled invariance	78
2.2.4 Nonlinear realization theory	83
<i>Notes and References for Chapter 2</i>	93
3. HAMILTONIAN SYSTEMS	95
3.1 Introduction	95
3.1.1 Static Hamiltonian systems; reciprocity	99
3.1.2 Nonlinear LC-networks	105
3.1.3 Hamiltonian vectorfields	108
3.1.4 Hamiltonian transfermatrices	110
3.2 Hamiltonian systems; general definitions	111
3.2.1 Hamiltonian interconnections	119
3.2.2 About forces	122
3.2.3 Controllability and observability	124
3.2.4 Equivalent Hamiltonian systems	127
3.3 Affine Hamiltonian systems	129
3.3.1 Controllability and observability	135

3.3.2	Equivalent affine Hamiltonian systems and reduction of the state space	139
3.4	The rigid body with external torques	143
3.5	Linear Hamiltonian systems	149
3.5.1	Realization theory for linear Hamiltonian systems	154
3.6	Lagrangian systems and the Euler-Lagrange equations	161
3.7	Internal energy and external work	164
3.8	Variational principles, realization theory for Hamiltonian systems and the inverse problem of the calculus of variations	166
	<i>Notes and References for Chapter 3</i>	173
4.	SYMMETRIES, CONSERVATION LAWS AND TIME-REVERSIBILITY	174
4.1	Symmetries and conservation laws	174
4.1.1	Symmetries and conservation laws for Hamiltonian systems	182
4.1.2	Symmetries and conservation laws for affine Hamiltonian systems	185
4.1.3	Symmetries and conservation laws for linear Hamiltonian systems	191
4.2	Time-reversibility	192
4.2.1	Time-reversibility for Hamiltonian systems	196
4.2.2	Time-reversible affine Hamiltonian systems	197
4.2.3	Time-reversible linear Hamiltonian systems	200
4.2.4	Synthesis of linear LCT-networks	203
	<i>Notes and References for Chapter 4</i>	213
5.	GRADIENT SYSTEMS	214
5.1	Introduction	214
5.2	Gradient systems, affine gradient systems	218
5.2.1	Controllability, observability and equivalence of affine gradient systems	221
5.2.2	Linear gradient systems	223

5.3 Relationships between gradient systems and Hamiltonian systems	227
<i>Notes and References for Chapter 5</i>	233
6. OPTIMAL CONTROL AND HAMILTONIAN SYSTEMS	234
<i>Notes and References for Chapter 6</i>	243
CONCLUDING REMARKS	244
REFERENCES	246
SUBJECT INDEX	253
SYMBOL INDEX	255
