

CONTENTS

CHAPTER I CONVEX SETS

1. Elementary definitions	5
2. Boundary indices	6
3. Convex representation	8
4. Convex cones. Duality.	10
5. Conjugate points	14

CHAPTER II

THE MOMENT SPACE D^n AND ITS DUAL P^n

6. Distribution functions on $[0, 1]$	18
7. The moment space D^n	20
8. The polynomial space P^n	23
9. The boundary of P^n	27
10. A property of the extreme points of P^n	32
11. The boundary of D^n	36

CHAPTER III

THE SIMPLEXES S^n AND B^n

12. The simplex S^n	43
13. The dual simplex B^n	46
14. Fit of S^n and B^n to D^n and P^n	48
15. Comparison of volumes	51

CHAPTER IV

ALGEBRAIC DESCRIPTION OF THE MOMENT SPACES

16. Moment sequences and quadratic forms	54
17. The determinants Δ_m and their relation to the faces of D^n	56
18. The lower and upper boundaries of D^n	59

CHAPTER V

DISTRIBUTIONS HAVING GIVEN MOMENTS

19.	The polynomials $\underline{\Delta}_m(t)$ and $\overline{\Delta}_m(t)$	61
20.	Construction of distribution functions	64
21.	Characterization of the set of distribution functions with given moments	66
22.	Intertwining property of functions in $\mathcal{D} x$	68

CHAPTER VI

APPLICATION TO ORTHOGONAL POLYNOMIALS

23.	Orthogonality of the Δ -polynomials	71
24.	Separation of roots. Christoffel numbers.	73
25.	Geometry of the Tchebycheff polynomials	75

CHAPTER VII

SYMMETRIES OF THE MOMENT SPACES

26.	Reversal of the unit interval	82
27.	Moment space of symmetric distributions	86
28.	Other symmetries	89
