

TABLE OF CONTENTS

LIST OF NOTATIONS	v
INTRODUCTION	1
CHAPTER I CONJUGACY CLASSES OF $Sp(2, \mathbb{Z})$	7
1.1 Introduction	7
1.2 Representatives of conjugacy classes of finite order elements	8
1.3 Conjugacy classes of finite order elements in $Sp(2, \mathbb{Z})$	11
1.4 Conjugacy classes of Γ_1^∞	14
1.5 Conjugacy classes of Γ_0^∞	17
CHAPTER II DIMENSION FORMULA FOR THE VECTOR SPACE OF CUSP FORMS OF DEGREE TWO WITH RESPECT TO $Sp(2, \mathbb{Z})$...	21
2.1 Introduction	21
2.2 Contributions from elliptic conjugacy classes ..	22
2.3 Contributions from conjugacy classes of elements having a one-dimensional set of fixed points (I)	23
2.4 Contributions from conjugacy classes of elements having a one-dimensional set of fixed points (II)	30
2.5 Contributions from conjugacy classes of elements having a two-dimensional set of fixed points ...	37
2.6 Contributions from conjugacy classes of unipotent elements	43
2.7 A dimension formula for the vector space of cusp forms with respect to $Sp(2, \mathbb{Z})$	44
CHAPTER III REPRESENTATIVES OF CONJUGACY CLASSES OF ELEMENTS OF $Sp(3, \mathbb{Z})$ IN $Sp(3, \mathbb{R})$	46
3.1 Introduction	46
3.2 Conjugacy classes of torsion elements in $Sp(3, \mathbb{Z})$	47
3.3 A classification of conjugacy classes of $Sp(3, \mathbb{Z})$	51
3.4 Selberg's trace formula and its modification ...	56
3.5 Conjugacy classes with zero contribution (I) ...	62
3.6 Conjugacy classes with zero contribution (II) ...	66
CHAPTER IV CONTRIBUTIONS FROM CONJUGACY CLASSES IN $\Delta \cup \Delta_1 \cup \Delta_2 \cup \Delta_0$	81
4.1 Introduction	81
4.2 Contributions from elliptic conjugacy classes ..	82
4.3 Contributions from conjugacy classes of elements having a one-dimensional set of fixed points ...	86
4.4 Contributions from conjugacy classes of elements having a one-dimensional set of fixed points ...	97

4.5	Contributions from conjugacy classes of elements having a two-dimensional set of fixed points	114
4.6	Second case of conjugacy classes of elements having a one-dimensional set of fixed points	127
4.7	Second case of conjugacy classes of elements having a two-dimensional set of fixed points	135
CHAPTER V	CONTRIBUTIONS FROM CONJUGACY CLASSES IN Δ_0	142
5.1	Introduction	142
5.2	A dimension formula for the principal congruence subgroup $\Gamma_2(N)$	142
5.3	Contributions from $\Delta_0(I)$	149
5.4	A dimension formula for the principal congruence subgroup $\Gamma_3(N)$	154
5.5	Contributions from $\Delta_0(II)$	169
5.6	A final remark	180
