

TABLE OF CONTENTS

1. Introduction	1
2. Definitions and preliminaries	3
3. Statements of results	14
4. Outline of proofs	20
5. Semi-invariance of systems of cones	24
6. Construction of invariant line fields	34
7. Existence and uniqueness of stable and unstable curves	55
8. Local topological conjugacy	87
9. Uniform contraction lemma for stable curves	97
10. Markov partitions and global topological conjugacy	104
11. Conditional stability of smooth models of generalized pseudo-Anosov maps	107
References	116
