

## Table of Contents

### Article 1: Geometric consequences of Ueda's results

§0: Introduction	1
§1: The Ueda class	4
§2: Variation of the Ueda class	11
§3: The Ueda class and plurisubharmonic functions	16
§4: The proofs of Lemma 3.2 and Lemma 3.4	25
§5: The Ueda class of curves on projective surfaces	32
§6: The case of elliptic curves	38
§7: Sections of $P^1$ -bundles	51
§8: The functoriality of the Ueda class	59
§9: Ueda classes of high type	64
§10: A different example	73

### Article 2: Problems in Ueda theory

§0: Introduction	91
§1: Infinitesimal connections	93
§2: Lifting infinitesimal connections	96
§3: The Ueda class	102
§4: Variation of the Ueda class	106
§5: The Ueda class of $M \subset X$ with a torsion normal bundle	108
§6: Classification	114
§7: Higher dimensions	117
§8: Computations of some Ueda classes	118
§9: Elliptic curves $M \subset X$ with $u(M, X) \neq 0$	121
