

TABLE OF CONTENTS

Introduction	1
Chapter I. Vertex Operator Algebras	17
Section 1. Fock Spaces	18
1-A. Fock spaces	18
1-B. Double Fock Spaces	23
Section 2. Vertex Operators	25
2-A. Vertex Operators	25
2-B. Neutral Vertex Operators	36
Section 3. Representations	38
3-A. Vertex Operator Algebras	38
3-B. Virasoro Algebra	41
3-C. Affine Kac-Moody Lie Algebras	42
Chapter II. Geometric Realization of Vertex Operator Algebras	46
Section 4. Functional Realization of Fock Spaces	47
4-A. Gaussian Measures	47
4-B. Functional Realization of Fock Spaces	53
Section 5. Function Spaces on Riemann Surfaces	59
5-A. General Theory	59
5-B. Examples	66
Section 6. Geometric Realization of Vertex Operators	72
6-A. Gaussian Integrals over Harmonic Functions	73
6-B. String Path Integrals on Disks with Holes	81
6-C. Geometric Realization of Vertex Operators	87

Chapter III. Analytic Realization of Vertex Operator Algebras	94
Section 7. Zeta-Regularization	95
7-A. Zeta-Regularized Infinite Products	95
7-B. Zeta-Regularized Determinant of Laplacian and Conformal Anomaly	97
Section 8. Zeta-Regularized Determinants on Cylinders and Elliptic Curves	101
8-A. Zeta-Regularized Determinants on Elliptic Curves	101
8-B. Zeta-Regularized Determinants on Cylinders	104
8-C. Sewing of Determinants on Cylinders	110
Section 9. String Path Integrals over Cylinders and Elliptic Curves	113
9-A. String Path Integrals on Elliptic Curves	113
9-B. String Path Integrals on Cylinders	117
9-C. Analytic Realization of Vertex Operators	122
9-D. Sewing of String Path Integrals on Cylinders	127
 Appendix	 132
Section A. Poisson Summation Formula	132
 References	 135
